Dinas Komunikasi dan Informatika (DINKOMINFO) is one of the government agencies engaged in the field of technology that has authority in the use of technology to be applied to other government institutions. In the context of the government's efforts to increase the position and class of employees of the Computer Engineering Functional Position, credit proposals are needed. This report focuses on the development needs of the system for inputting credit numbers by Computer Institution Position Employees in accordance with the needs of the Banyumas Communication and Information Agency. The result of the preparation of this report is that it can build a system capable of evaluating and evaluating credit figures.

Keywords: computer institutions, credit numbers DINKOMINFO, evaluation, functional positions.
