

## **ABSTRACT**

*Practical Work Course is one of the compulsory courses for students of the Faculty of Electrical Engineering to learn and participate directly in a company, institution, or agency related to the Faculty of Electrical Engineering. By carrying out this practical work, students are expected to realize the knowledge learned on campus and can also adapt to the work environment. Practical work is carried out in even semesters. Practical work is carried out at PT. Telkom Satelit Indonesia, Tbk Bogor which is a subsidiary of Telkom, a satellite service provider that is expert in providing high quality and international standard upstream to downstream services. Practical work was carried out from August 08 to September 15, 2023 and had the opportunity to work in the Network Engineering & Performance division. The author conducts registration assisted by field supervisors to carry out these activities.*
