

## **ABSTRACT**

### ***WEB-BASED APPLICATION FOR SALES OF STANDARD NEEDS USING THE SCRUM METHOD***

oleh

Zulfiqar Ridho Fikriansyah

*Toko Kesih is a business engaged in the field of basic food needs for people who need it around the shop, on Jalan Kenduruan, Bobotsari sub-district, Purbalingga district. But in running this business there are obstacles faced by shop owners, the obstacle is that the cashier has difficulty memorizing prices so he has to ask the shop owner and also delete the bookkeeping of reports that have piled up in conventional stores replaced with reports stored in the database. The purpose of the research in this final project is that the website is useful for using pet shop transactions and the website is useful for the reporting section. The method used in this research uses the scrum method in making and developing shop websites. The results of this study are the development of a website for a grocery store using the Scrum development method. Helping kesih shops to solve problems with cashiers and reports that are still conventional.*
