

## **ABSTRACT**

Internship and Certified Independent Study (MSIB) are part of the Kampus Merdeka program, which aims to provide opportunities for students to learn and develop themselves through activities outside of the classroom. There are many partners who contribute to sharpening students' knowledge, one of which is PT Kinema Systrans Multimedia. The MSIB program is a short infinite learning bootcamp and final project certification. This program focuses on learning about mobile application programming language Kotlin as a foundation. The curriculum taught includes design, variables, commands, arrays, methods, and functions up to OOP. It is expected that after completing this program, students will master the basics of mobile applications and be able to apply them to their final projects. Students who graduate from this program are expected to be able to create a mobile application using Figma design and work as mobile developers.
