

ABSTRACT

This report is written to fulfill the requirements for the Practical Work course in the Software Engineering Study Program. It is based on the author's experience during the Certified Internship Program under the Kampus Merdeka initiative at PT. Inti Utama Solusindo, which is part of the Pharos Group, one of the largest pharmaceutical companies in Indonesia. PT. Inti Utama Solusindo focuses on the development of software technology, robotics, medical devices, and the healthy food industry. One of the company's flagship projects is HealthyOne, an integrated healthy lifestyle platform currently being developed to meet the healthcare needs of the Indonesian population by integrating health standards such as INA-CBG and ICD-10. During the internship, the author served as a Back End Developer, contributing to the development and improvement of design systems, prototyping, and conducting usability testing.

Keyword: *Back End Developer, HealthyOne, PT. Inti Utama Solusindo, Pharos Group, Kampus Merdeka*
