In this modern era, various applications have started to be online or website based, the use of this website-based application makes it easy for users to access the application anytime and anywhere. With the advancement of current technological developments that are not matched by filling in data or credit figures that are useful for promotion of civil servants who are still fairly manual because the filling must be done directly and still use leaflets. For this reason, the creation of a website-based application is very necessary to make it easier for various parties to collect information on credit numbers.

With the creation of a proposal listing application for setting online credit numbers or online dupak, civil servants no longer need to fill in credit numbers on leaflets, they only need to open duplicate applications online through the browser on their computer or mobile device.

Hope after the creation of this online dupak application, filling in credit numbers becomes easier and saves costs which should be used to make leaflets determining credit numbers.
