The Physical Data Management System at the Jakarta and Banten Railway Engineering Office, is a system created by the Practical Working Team. To support progress in the information system, a payment system is needed.

Checking the system is very necessary in system information, because it can cause errors or errors caused by the system. In addition, system testing also needs to be done to find out which system is made according to the request.

The results of this test are systems that have no errors or bugs, and are in accordance with what was requested by the Jakarta and Banten Railway Engineering Office.
