

ABSTRACT

PT. AUTOJAYA IDETECH ANALISIS QUALITY CONTROL PRODUCT PM80 DI PT AUTOJAYA IDETECH & PT SOLUSI PERIFERAL.

The increasing number of mobile 80 point requests based on mobile computing at PT. Auto Jaya Idetech raises problems and disruptions that occur. Problems with the quality control process such as incorrectly entering the password and the scanner are not functioning properly. To overcome these problems, the distance between the placement of password labels and the quality control process carried out on product pm 80 includes testing scanners, keyboard testing and wifi testing. Quality Control is very useful to ensure that PM80 can function properly. products that have passed the quality control process will affect the quality of the product that will be marketed so that customers no longer have to worry about the failure of the product because they have obtained quality assurance from the company through a quality control process. The result of the quality control process is an assessment of the feasibility of an item.
