The development of information technology, especially the internet, which has been very rapid in the last decade has made communication and information dissemination faster and easier, without limitation of space and time, technological developments, especially in the field of administration and promotion, have made companies keep abreast of technological developments. -companies create websites to attract sales power, trust, and at the same time facilitate the company in the administrative process. In this case the author will design an information website to help CV. Putra Tunggal Psychology Bureau in facing competition in the current era of globalization..

A website has a collection of site pages, which are usually encapsulated in a domain located on the World Wide Web (WWW) page on the Internet. CV Biro Psikologi Putra Tunggal is a company engaged in consulting services, in which to promote its consulting services using manual promotions such as; brochures, pamphlets, newspapers, etc. to attract client attractiveness, with this website it is hoped that this website will increasingly attract client attention due to the dynamic appearance of the website and complete with the information needed by clients, so that it has more selling value for CV. Putra Tunggal Psychology Bureau because the website display is dynamic and easy to understand.
