

ABSTRACT

Putra Pamungkas Tegar Iman (17104031), 2020- **MOBILE-BASED BOOKWARE EVALUATION APPLICATION USING THE USABILITY SCALE (SUS) QUESTIONNAIRE SYSTEM**

The presence of today's technology that will be more advanced and developed brings very significant changes in several sectors, such as libraries. The development of the internet can add to the development of new digital information quickly so that it demands and is required to grow, such as in the book warehouse, which is used for online book rentals, with this the user will no longer be physically bound to the hours of service for borrowing books from the book warehouse. Because of the presence of the book warehouse, which is to make it easier for users to borrow at any time without having to look for information to the location because it can be accessed through the application, just using a mobile phone will all be resolved. Keywords: Book warehouse, SUS method, technology
