

ABSTRACT

The rapid spread of this outbreak has forced countries to take preventive, curative and promotional measures for their citizens. However, during the Covid-19 period, online learning or distance learning was considered not yet fully effective in its implementation. Overcoming this problem, the Teaching Campus Program Batch 1 was created in which, in the form of teaching assistance to empower students in helping the learning process in elementary schools (SD) in various villages/cities in Indonesia, which are still the highest accredited B. The goal is to optimize the abilities of students to assist the learning process. teaching in elementary schools around the village/city where he lives.

Activities carried out by students include mentoring learning activities, especially literacy and numerization, adapting technology and assisting school administration. The results of the activities that have been carried out are a significant increase in students at SD Negeri 29 Bengkulu City in mastering literacy and numeracy. Teaching is carried out not only in the classroom but also in personal assistance to students who have not mastered literacy and numeracy. Thus, being able to provide learning motivation for students to learn these two competencies. Teachers can operate programs such as Powerpoint which can help create learning materials easily. In school administration we also assist in inputting student academic scores, making report cards, making lesson plans and syllabus.
