

ABSTRACT

Indonesia is one of the countries affected by technological developments, including all the existing field including Education, Social to Economy. This is what makes Indonesia a country that is starting to develop with technology. An example is a website-based online shopping application developed by technology laboratory called PT. Puskomedia Indonesia Kreatif. The application is named Dumoro. This application is a new way of Puskomedia to help people to buying and selling easily and quickly. Puskomedia really understand the needs of today's business trends, so Dumoro was created. Dumoro will help people to be able to sell in online stores with their own brand independently. Apart from being an onlineshop, Dumoro also available in the form of a cashier and accounting application. Through valid bookkeeping, Dumoro keeps the partner's business sustainable. Dumoro is also equipped with a Rest-API based database which will make it easier for data to be stored in real time, Which will speed up the transaction process.
