

ABSTRACT

Indonesia is one of the countries affected by technological developments, including all the existing fields including Education, Health, Social to Economy. This is what makes Indonesia a country that is starting to develop with technology. An example is a digital payment application developed by an application development company called PT. Puskomedia Indonesia Kreatif. The application is named Dumoro. This application is a new way of Puskomedia to help users create a business quickly and practically. Puskomedia really understands the needs of today's business trends, therefore Dumoro was created. This application has several features, namely online shop, accounting, cashier, and payment. One of the features above is payment, this feature helps the digital payment process so that the payment process can be easier and faster. With these features, it helps to organize your business easier and more organized.

Keywords: Puskomedia, Dumoro, Payment.
