

ABSTRACT

As an organization engaged in the world of education, from the beginning, Ruangguru believed in the importance of investing in human resource development. Ruangguru is committed to improving the quality of human resources and preparing students to be ready to compete in the world of work through the Independent Study program, which includes learning about Frontend Engineering, Backend Engineering, and Data Business Analytic Ops. Frontend Engineering has a role to create high quality websites and dynamic applications to provide the best user experience is very important to increase the competitiveness of a product or service. Participants are expected to be able to build responsive & interactive website applications using the latest technology that is widely used in the industry. Program Graduates can work in the fields of web development, and software development, with specific roles as Front-End Developer and Front-End Engineer.

Key Word : Frontend Engineer, Website, Backend Engineer, Data Business Analytic Ops.
