The Department of Youth, Sports, Culture and Tourism of Banyumas Regency is one of the government agencies that handles activities for tourism. The tourist village of Kemutug Lor is one of the alternative tourist destinations in Banyumas Regency. The tourist village of Kemutug Lor is a national government agency engaged in agriculture and trade which struggles to introduce a system of organizational structures, activities and tourist attractions that are currently only known by the surrounding community. The background was appointed based on the need for an information system that can provide comprehensive information quickly and accurately, because the delivery of information about tourism in Kemutug Lor village for now is still with brochures, in other words the delivery of this kind of information is not effective enough and not capable enough. attract tourists to visit the village of Kemutug Lor. The design of the Kemutug Lor village website has a User Interface that will be easy to use so that visitors interact or use the website in finding various information needed by visitors and a website that has a simple User Interface display is one of the information and promotion media for the Kemutug Lor tourist village to display images. which represents the tourist village of Kemutug Lor as a tourist destination that has a variety of tourism and culinary delights, and has complete features as a User Interface on the website of tourist destinations.

Keywords: Website, User Interface, Kemutug Lor tourist village
