

ABSTRACT

The information system is one of the facilities and infrastructure to be able to effectively disseminate information. In media facilities and information dissemination infrastructure, both in general and in particular, as in the special case of Banyumas Regency. The Department of Youth, Sports, Tourism and Culture of Banyumas Regency in the field of sports created an Athlete Data information system. Where the Information System is still in the development stage, the author is assigned to develop a system on the back-end side of the Data Athlete website. Where the system that has been developed helps DINPORABUDPAR Banyumas Regency to be able to manage athlete data efficiently and assist in managing athlete data collection.
