

ABSTRACT

HONF (House Of Natural Fiber) Foundation is a Yogyakarta new media art laboratory run by a community in Yogyakarta. Most of the communities that collaborate with HONF are related to technological developments, innovations and fine arts. So far HONF has carried out various projects that focus on the implementation of art and technology, HONF is a pioneer and community in the field of art and technology in the Yogyakarta area, Central Java. As an art community, HoNf often conducts exhibitions, including Together with Nandur Srawung, who is the executor of exhibitions carried out by the Yogyakarta government. Exhibitions in art require the layout design needed in a gallery to oversee the performance and course of exhibitions in the gallery. The design is arranged according to the theme, the state of the gallery and the number of visitors. Due to covid-19, the use of layout is very necessary and must be adjusted to the circumstances. Honf as part of the layout will affect the smooth running of the event and the achievement of the desired exhibition.
