

## **ABSTRACT**

CV Sentrautama Consulindo is a private company engaged in consulting services with various partners including the government in carrying out national development. In carrying out its work, CV Sentrautama Consulindo will focus on the quality of the surveyors they have so that the work goes well. CV Sentrautama Consulindo itself is involved in several national development activities in 2021, namely the preparation of the Technical and Institutional Socio-Economic Profile (PSETK) in Banyumas. This activity itself was carried out in the Banyumas district in more detail in the sub-districts of Ajibarang, Purwokerto and Jatilawang. In this PSETK activity, surveyors only do data collection and analysis, but the way it works itself is still quite ineffective. So that the preparation of an information system to facilitate the passage of activities is very necessary as the main solution to the problem, besides that with this solution later the information system can be reused by the government in this case is BAPPEDALITBANG Banyumas for the benefit of data mining and archiving for the benefit of other partners
