ABSTRACT

Muhammad Humam Zaky (18102168), 2021 – *USER INTERFACE DESIGN ON WEB-BASED DISPENSATION PERMITS INFORMATION SYSTEM USING BOOTSRAP FRAMEWORK*

Badan Pusat Statistik (BPS) of Banyumas Regency is a government agency that has the task of recording various activities. In doing so, BPS Banyumas has used an information system to facilitate the work of its employees. The information system owned by BPS Banyumas is called Monika (Activity Monitoring) which can monitor all activities. One of the employee activities in general is official activities outside the office. Based on interviews conducted by the author and colleagues, BPS Banyumas requires an information system that records employee leave permits. Therefore, the author helps the development of the system on the display using the bootstrap framework. This is to support systems that will be built by colleagues using other web programming languages.

Keywords*: *BPS, Bootstrap, Framework, Monika
