

## **Abstract**

One of the goals in order to be able to carry out tasks in the world of work is to have experience. Work experience can be obtained from anywhere and anytime, in seeking work experience, you must be active in every job you receive, so that later when you get a better job, you can apply a better work style as well and reduce the impact of mistakes that may be unintentional on the job. while doing work. One place that can provide a good work experience is Internship Jogja, which is a place that provides for the general public who want to have experience working in a real workplace and this Jogja Internship is a place for writers to train and also develop work experience. In this Jogja Internship place, the author also makes an Internship report with the title UI/UX Creation for ApprenticeshipJogja.com Using Figma. This report contains the work experience received by the author during his internship at Magang Jogja within 3 months and one of the results of the work that has been made by the author.
