Balas Ke: "T. Sutikno Ijeecs Editor" <ijeecs@iaescore.com>

Kepada: Tenia Wahyuningrum <tenia@ittelkom-pwt.ac.id>, Gita Fadila Fitriana <gita@ittelkom-pwt.ac.id>, Dyah Wahyuningsih <dyahwahyuningsih@poltekkes-smg.ac.id>

- Please Strictly use & follow to the template manuscripts: <http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-5> to avoid delays
- Similarity score of your final manuscript must be less than 25%
- Original research paper: Min number of references is 25 sources (included min 20 recent journal articles).
- Review paper: Min number of references is 50 sources (included min 40 recent journal articles).

Dear Mrs. Tenia Wahyuningrum,

Congratulations - your paper #1570764342 ('The Combination of URUT and UMUX-Lite in Evaluating User Experience on the Suicide Risk Idea Identification Application') for the Indonesian Journal of Electrical Engineering and Computer Science (a Scopus indexed journal) (IJEECS) has been ACCEPTED with minor revisions. The IJEECS, p-ISSN: 2502-4752, e-ISSN: 2502-4760 is a monthly peer reviewed International Journal in English, indexed by Scopus (CiteScore 2019: 1.4, SNIP 2019: 0.649, SJR 2019: 0.21, Q3 on Electrical and Electronic Engineering, Q3 on Computer Networks and Communications, Q3 on Hardware and Architecture, Q3 on Signal Processing, and Q3 on Control and Optimization), EI (INSPEC, IET), Google Scholar Metrics, ProQuest, EBSCO, BASE, OALib, SHERPA/RoMEO etc. The aim of this journal is to publish high-quality articles dedicated to all aspects of the latest outstanding developments in the field of electrical engineering. Its scope encompasses the applications of Telecommunication and Information Technology, Applied Computing and Computer, Instrumentation and Control, Electrical (Power), and Electronics Engineering.

Please make the necessary changes based on reviewers' comments and suggestions. For improving your paper, please read our published papers and cite them as appropriate. Search within <https://www.scopus.com/results/results.uri?sort=plf-f&src=s&sid=028217d99e516e69288d95d6f7c6fdc5&sot=a&sdt=a&sl=104&s=SOURCE-ID+%2821100258382%29+OR+SOURCE-ID+%2821100373959%29+OR+SOURCE-ID+%2821100826382%29+OR+SOURCE-ID+%2821100901206%29&origin=searchadvanced&editSaveSearch=&txGid=7593add58cbc5ed145d2e4ac71c010f9> in the upper left side by typing your keywords to find related papers. For your information, according to international regulations, similarity score of camera-ready paper must be less than 25%. Single author is PROHIBITED. The reviews are below or can be found at [1570764342](#). Please prepare your final camera ready paper (in MS Word file format) adheres every detail of the guide of authors (<http://iaescore.com/gfa/ijeecs.docx>), and check it for spelling/grammatical mistakes. The goal of this camera ready paper is to describe NOVEL TECHNICAL RESULTS.

For original research paper, there are four (4) types of novel technical results: 1) An algorithm; 2) A system construct: such as hardware design, software system, protocol, etc.; The main goal of your revised paper is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed; 3) A performance evaluation: obtained through analyses, simulation or measurements; or 4) A theory: consisting of a collection of theorems. Your final camera ready paper should focus on: 1) Describing the results in sufficient details to establish their validity; 2) Identifying the novel aspects of the results, i.e., what new knowledge is reported and what makes it non-obvious; and 3) Identifying the significance of the results: what improvements and impact do they suggest. Number of minimum references for original research paper is 25 sources (included 20 recently journal articles).

URGENT!! Pay attention to the following instructions carefully! YOU MUST DO your best!!

1). PLEASE ADHERE STRICTLY THE GUIDE OF AUTHORS <http://iaescore.com/gfa/ijeecs.docx> (Use this file as your paper template!!) and pay attention to the checklist for preparing your FINAL paper for publication: <http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-3>

2). It is mandatory to present your final paper according to "IMRAD style" format, i.e.:

1. INTRODUCTION

2. The Proposed Method/Algorithm/Procedure specifically designed (optional)

3. METHOD

4. RESULTS AND DISCUSSION

5. CONCLUSION See <http://iaescore.com/gfa/ijeecs.docx>

3). Add biographies of authors as our template (include links to the 4 authors' profiles, do not delete any icons in the template). --> Provide links for all authors to the 4 icons (Scholar, Scopus, Publons and ORCID). It is mandatory!! See <http://iaescore.com/gfa/ijece.docx>

4). Prepare all tables as our template (NOT as figure)

5). Use different PATTERNS for presenting different results in your figures/graphics (instead of different colors). It is mandatory!! See <http://iaescore.com/gfa/ijeecs.docx>

6). Please ensure that all references have been cited in your text. Use a tool such as EndNote, Mendeley, or Zotero for reference management and formatting, and choose IEEE style. Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3], [4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list. Examples of in-text citations: This theory was first put forward in 1970 [9]. Zadeh [10] has argued that ... Several recent studies [7], [9], [11]-[15] have suggested that.... ... end of the line for my research [16].

Number of minimum references for original research paper is 25 sources (included 20 recently journal articles).

Number of minimum references for review paper is 50 sources (included 35 recently journal articles).

7). Please present all references as complete as possible and use IEEE style (include information of DOIs, volume, number, pages, etc). If it is available, DOI information is mandatory!! See <http://iaescore.com/gfa/ijeecs.docx>

For your information, according to international regulations, similarity score of camera-ready paper should be less than 25%. Single author is NOT allowed. The Editor(s) will check whether the final version has been performed and already address the reviewers' comments or not. Failing to do proper revision may lead to the rejection of your paper.

Please submit your documents below:

- final camera ready paper
- similarity report (by iThenticate or Turnitin), and
- payment evidence

to: ijeecs.iaes@gmail.com as soon as possible

I look forward for your response

Sincerely yours,

Assoc. Prof. Dr. Tole Sutikno

Editor-in-Chief,

Indonesian Journal of Electrical Engineering and Computer Science

<http://ijeecs.iaescore.com>

email: ijeecs@iaescore.com, ijeecs.iaes@gmail.com

Online paper submission: <https://edas.info/N28523>

Below is the reviews on your papers:

Please pay an attention to double check your final camera ready paper:

(1) TEMPLATE, Please Strictly use and follow to the template Manuscripts (Word Format): <http://iaescore.com/gfa/ijeecs.docx> or <http://iaescore.com/gfa/ijeecs.rar> (LaTeX format). If you use LaTeX, submit your LaTeX source files to ijeecs.iaes@gmail.com

For original research paper:

(2) Authors are suggested to present their articles with IMRaD sections structure (outline): Introduction - The Proposed Method/Algorithm/Procedure specifically designed (optional) - Research Method - Results and Discussion – Conclusion.

Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

(3) Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following three (3) elements:

- **Background:** Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the-art of the field the report is about.
- **The Problem:** If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- **The Proposed Solution:** Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are cited to support this section.

(4) Method section: the presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

(5) Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. This is where the author(s) should explain in words what he/she/they discovered in the research.

(6) (URGENT)!!! About Figures & Tables in your manuscript:

- Because tables and figures supplement the text, all tables and figures should be REFERENCED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.
- Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables are NOT allowed.
- All figures MUST in high quality images

(7) Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph. Are the claims in this section supported by the results, do they seem reasonable? Have the authors indicated how the results relate to expectations and to earlier research? Does the article support or contradict previous theories? Does the conclusion explain how the research has moved the body of scientific knowledge forward?

(8) Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.

Examples of in-text citations:

This theory was first put forward in 1970 [9].

Zadeh [10] has argued that...

Several recent studies [7], [9], [11-15] have suggested that....

... end of the line for my research [16].

(9) Please ensure the maximum page of your final paper is 8-page, but still allowed up to 14 pages (required to pay an extra fee).

In order to cover part of the event cost, each accepted paper will be charged: USD 295 (~IDR 4300K)

This article publication charge (APC) is to support the cost of wide open access dissemination of research results, to manage the various costs associated with handling and editing of the submitted manuscripts, and the Journal management and publication in general, the authors or the author's institution is requested to pay a publication fee for each article accepted. The USD 295 fee covers the standard eight (8) pages manuscript. For every additional page an extra fee of USD 50 (~IDR 700K) per page will be charged.

The payment should be made by bank transfer (T/T):

 Bank Account name/Beneficiary (please be exact): TOLE SUTIKNO
 Bank Name: Bank Syariah Indonesia (PT Bank Syariah Indonesia Tbk)
 Branch Office: Yogyakarta Kusumanegara

City: Yogyakarta
Country: Indonesia
Bank Account #: 7168633321
SWIFT Code (BIC): **BSMDIDJAXXX** (formerly SYNIIDJAXXX)
or through PayPal (as an alternative of bank transfer) to email: info@iaesjournal.com

Bank's detailed address:
Bank Syariah Indonesia (BSI)
Jl. Kusumanegara No.112, Muja Muju
[Kec. Umbulharjo](#)
City: Yogyakarta
Province: D.I. Yogyakarta (DIY)
Country :Indonesia
Post Code: 55165
Indonesia, Phone:+62 274 417222

The Beneficiary's address:
D2, Griya Ngoto Asri, Bangunharjo, Sewon
City: Bantul
Province: D.I. Yogyakarta
Post Code: 55187
Country: Indonesia

Noted:

Your paper will be scheduled for publication after your final manuscript along with your payment evidence reached us.
Your final manuscript **MUST** passed from our checklist (<http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-3>)

Dear Prof./Dr./Mr./Mrs. **Tenia Wahyuningrum**

I am Jessy writing on behalf of the layout and editing team, under the auspices of the Indonesian Journal of Electrical Engineering and Computer Science team. We are glad to inform you that your paper is in the layout stage for possible publication in the forthcoming issue of this journal. Your cooperation for final checking and/or updating your paper is required. Please find the attached file (including comments and/or marked parts) to take further actions. **Kindly submit your updated paper within 1 day until June 10, 2022. Please revise the file that is attached in this email. Send the revised version by reply to all this email.**

Please note that this email is only assigned for layout and editing purposes. For other communication purposes, reach us through the principal contact of the journal.

Your cooperation is highly appreciated.

Best regards,

Jessy R.**Layout and Editing Team****Indonesian Journal of Electrical Engineering and Computer Science**<http://ijeeecs.iaescore.com/index.php/IJEECS>

- Review paper: Min number of references is 50 sources (included min 40 recent journal articles).

=====
=====

Dear Mrs. Tenia Wahyuningrum,

We have reached an initial screening phase regarding your paper submission #1570764342 entitled "The Combination of URUT and UMUX-Lite in Evaluating User Experience on the Suicide Risk Idea Identification Application" to Indonesian Journal of Electrical Engineering and Computer Science (a Scopus indexed journal) (IJEECS). The IJEECS ISSN: 2502-4752, e-ISSN: 2502-4760 is a monthly peer reviewed International Journal in English, indexed by Scopus (CiteScore 2019: 1.4, SNIP 2019: 0.649, SJR 2019: 0.21, Q3 on Electrical and Electronic Engineering, Q3 on Computer Networks and Communications, Q3 on Hardware and Architecture, Q3 on Signal Processing, and Q3 on Control and Optimization), EI (INSPEC, IET), Google Scholar Metrics, ProQuest, EBSCO, BASE, OALib, SHERPA/RoMEO etc. The aim of this journal is to publish high-quality articles dedicated to all aspects of the latest outstanding developments in the field of electrical engineering. Its scope encompasses the applications of Telecommunication and Information Technology, Applied Computing and Computer, Instrumentation and Control, Electrical (Power), and Electronics Engineering.

Our decision is: Revisions Required before review process

A high quality paper should has:

- (1) a clear statement of the problem the paper is addressing;
- (2) the proposed solution(s); and
- (3) results achieved. It describes clearly what has been done before on the problem, and what is NEW.

The goal of your first revision is to describe NOVEL technical results.

Please note that there are four (4) types of technical results:

- (1) An algorithm;
- (2) A system construct: such as hardware design, software system, protocol, etc.;
- (3) A performance evaluation: obtained through analyses, simulation or measurements;
- (4) A theory: consisting of a collection of theorems.

Your revisions should focus on:

- (1) Describing the results in sufficient details to establish their validity;
- (2) Identifying the novel aspects of the results, i.e., what new knowledge is reported and what makes it non-obvious;
- (3) Identifying the significance of the results: what improvements and impact do they suggest.

The main goal of this stage is to ensure that the next person who designs a system like yours doesn't make the same mistakes and takes advantage of some of your best solutions. So make sure that the hard problems (and their solutions) are discussed and the non-obvious mistakes (and how to avoid them) are discussed.

Original/Research paper should be presented with IMRaD style/model:

1. Introduction
2. The Proposed Method/Algorithm/Procedure specifically designed (optional).

Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

3. Research Method
4. Results and Discussion
5. Conclusion.

We will usually expect a minimum of 25 sources (for research paper) and 50 sources (for review paper). You can find published papers in our other journals to enrich references in your paper

- <http://beei.org>
- <http://ijece.iaescore.com>
- <http://ijai.iaescore.com>
- <http://journal.uad.ac.id/index.php/telkomnika>
- <http://ijpeds.iaescore.com>
- <http://ijres.iaescore.com>
- <http://ijra.iaescore.com>
- <http://ijaas.iaescore.com>
- <http://ijape.iaescore.com>
- <http://ijict.iaescore.com>

to improve your paper.

Submit your revised paper within 14 days, and do serious work for updating your paper (upload as new review paper version). Revised paper submission is submitted (as author version) on the same paper ID number through EDAS online system. When your revised paper reached us, it will be sent for single blind peer review by at least three reviewers who will either be members of the Editorial Board or others of similar standing in the field, for contribution, originality, relevance, and presentation. Then, your paper will be judged for final decision of acceptance or rejection.

We look forward to receiving the revised version of your manuscript and are delighted that you chose to send this important work to this journal.

Best Regards,

Dear IJEECS editor,

Following up on my last email sent on 20 January 2022, regarding the revised paper. I want to be informed about whether I need to start by submitting the paper to the website. Kindly update me with confirmation that I can still go on proceeding with the paper for #1570764342. I am sorry for the inconvenience.

Best regards,
Tenia Wahyuningrum

- Please strictly use & follow to the template manuscripts: <http://iaescore.com/gfa/ijeecs.docx> to avoid delays
- Similarity score of your final manuscript must be less than 25%
- Original research paper: Min number of references is 25 sources (included min 20 recent journal articles).
- Review paper: Min number of references is 50 sources (included min 40 recent journal articles).

=====
=====

Dear Mrs. Tenia Wahyuningrum,

After careful review, your paper ID #1570764342, entitled "The Combination of URUT and UMUX-Lite in Evaluating User Experience on the Suicide Risk Idea Identification Application" for "Indonesian Journal of Electrical Engineering and Computer Science" requires MAJOR REVISIONS. For improving your paper, please read our published papers and cite them as appropriate. Search within <https://www.scopus.com/results/results.uri?sort=plf-f&src=s&sid=028217d99e516e69288d95d6f7c6fdc5&sot=a&sdt=a&sl=104&s=SOURCE-ID+%2821100258382%29+OR+SOURCE-ID+%2821100373959%29+OR+SOURCE-ID+%2821100826382%29+OR+SOURCE-ID+%2821100901206%29&origin=searchadvanced&editSaveSearch=&txGid=7593add58cbc5ed145d2e4ac71c010f9> in the upper left side by typing your keywords to find related papers. For your information, according to international regulations, similarity score of camera-ready paper must be less than 25%. Single author is PROHIBITED. The Technical Program Committee (TPC) will check whether the revision already address the reviewers' comments.

Indonesian Journal of Electrical Engineering and Computer Science (p-ISSN: 2502-4752, e-ISSN: 2502-4760) <http://ijeecs.iaescore.com> is a monthly peer reviewed International Journal in English, indexed by Scopus (CiteScore 2019: 1.4, SNIP 2019: 0.649, SJR 2019: 0.21, Q3 on Electrical and Electronic Engineering, Q3 on Computer Networks and Communications, Q3 on Hardware and Architecture, Q3 on Signal Processing, and Q3 on Control and Optimization), EI (INSPEC, IET), Google Scholar Metrics, ProQuest, EBSCO, BASE, OALib, SHERPA/RoMEO etc. You are asked to submit a revised full manuscript, according to the comment from reviewers.

The reviews are below or can be found at [1570764342](#), using your EDAS login name .

URGENT!!

- Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.

Examples of in-text citations:

This theory was first put forward in 1970 [9].

Zadeh [10] has argued that...

Several recent studies [7], [9], [11-15] have suggested that...

...end of the line for my research [16].

- Similarity score of your final manuscript must be less than 25%

- Original research paper: Min number of references is 25 entries/sources (included min 20 recent journal articles).
- Review paper: Min number of references is 50 entries/sources (included min 40 recent journal articles).

Please upload the revised paper using EDAS on the "Revision" upload button within 8 weeks.

Failing to do proper revision may lead to the rejection of your paper.

Thank you for your cooperation.

Online paper submission: <https://edas.info/N28523>

--

Double checklist for preparing your revised paper

(1) TEMPLATE, Please strictly use and follow to the template Manuscripts (Word Format): <http://iaescore.com/gfa/ijeecs.docx> (or <http://iaescore.com/gfa/ijeecs.rar> for LaTeX format)

(2) Authors are suggested to present their articles with IMRaD sections structure (outline): Introduction - The Proposed Method/Algorithm/Procedure specifically designed (optional) - Research Method - Results and Discussion – Conclusion. Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

(3) Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following three parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the-art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 15 references (recently journal articles) are referred in this section.

(4) Method section: the presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

(5) Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. Results given in figures should not be repeated in tables. This is where the author(s) should explain in words what they discovered in the research. It should be clearly laid out and in a logical sequence. This section should be supported suitable references.

(6) (URGENT)!!! About Figures & Tables in your manuscript:

- Because tables and figures supplement the text, all tables and figures should be REFERENCED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.
- Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables are NOT allowed.
- All figures MUST be prepared by yourself and presented in HIGH QUALITY images!!!

(7) Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph. Are the claims in this section supported by the results, do they seem reasonable? Have the authors indicated how the results relate to expectations and to earlier research? Does the article support or contradict previous theories? Does the conclusion

explain how the research has moved the body of scientific knowledge forward? CITATIONS in this section is NOT allowed!!!

(8) Most importantly, please ensure the similarity score is less than 25%. You can refer to EDAS to see the similarity score of your paper. Any paper with a similarity score of more than 25% will be dropped. Please make sure your revised paper follow this rule. If the similarity score of final version is more than 25%, the TPC has the right to cancel the paper to be presented at IJEECS 2021-22 Batch #2.

(9) Please ensure the maximum page of your final paper is 8-page, but still allowed up to 12 pages (required to pay an extra fee).

Dear IJEECS editor,

Regarding the issue to upload the paper revision, I am trying to submit my paper but am not able to upload it here <https://edas.info/showPaper.php?m=1570764342>, but I can not upload it. The error message is "However, authors cannot upload: auxiliary deadline".

Based on this case, could you help me in submitting my paper with the number of paper is #1404 (1570764342): The Combination of URUT and UMUX-Lite in Evaluating User Experience on the Suicide Risk Idea Identification Application. Here I have attached a Pdf file for your reference.

Thank you

Dear Tenia Wahyuningrum, Gita Fadila Fitriana, Dyah Wahyuningsih

Thank you for being a part of IJEECS's author, Your article entitled <> has been published in <>.

Share your work online to make it more visible to others and may increase your chances of citation!
Promoting your research is now easy thanks to sharing capabilities on social media websites, where you may already have numerous academic and industry connections, like on Twitter, Facebook, Instagram, LinkedIn, Google Scholar, ORCID, Mendeley, ResearchGate, Publons, or Academia.edu.

I hope you can continue to publish in IJEECS, last but not least, as a gratitude I am here to certificate for the author (file attached).
