Technological progress is something that cannot be avoided in this life. The use of information technology is a necessity for every company, and an approach is needed in developing an integrated system throughout the Purbalingga district community, therefore the Purbalingga SAR Website can produce more relevant information for the Purbalingga district community, this Website was created using WordPress, Xampp and the PhpMyAdmin database. It is hoped that this Website-based information system is by the needs of the community and is easy to use.

Keywords: Website, WordPress, Xampp, PHPMyadmin
