

## **ABSTRACT**

Melung Village is one of the villages that has the nickname internet village or Smart Village, therefore the author carries out a work program to provide a better website than before, because one of the supporters of the nickname and dream of the village is the existence of a good information system so that the information obtained can be published more accurately. Apart from being a Smart Village, Melung Village also has the potential of a Tourism Village, the website that will be created will also contain many tours in Melung Village so you can also visit these tours. the author will also make a tourism promotion video. This work program aims to solve problems faced by villages in the field of technology, especially village websites, village problems are limited website access resulting in villages not being able to freely add to the needs that need to be done by villages, the result of this work program is a website that can meet the needs of residents such as information fast and accurate, village officials can provide information to residents, and residents get administrative services online. The village website can also be operated and visited online. the tourism promotion produces a video with a duration of 2.30 minutes and a promotional video for SMEs 1.30 minutes which can be viewed on Youtube with the Melung channel, the promotional video has also been sent to the association's instagram admin.
