

## ABSTRACT

The Internet is one part of the rapid development of information technology and includes primary needs along with clothing, food, and boards. One of the advantages with the presence of the internet is the ease of democracy. Administration can now be done anywhere without having to come directly to the place.

In the preparation of the report, the writing methods carried out include: observation, which is to practice directly into the field; interview, i.e. direct Q&A with a field supervisor; and literature review, which includes the material, opinion, or discovery of a person into the discussion with the same problem. Internship Registration Application will be an application used to record students and students who want to do street vendors at DINKOMINFO Banyumas. In the creation of the PKL application prototype, it takes a display for the user, namely: Login and Register account, Home, Field Section, Filling out the Internship registration form, Check Registration Status. For the appearance on admin is: Home, List of Registrants, List of Accepted Students, Set Quota, Set Quota Section. In the implementation of Internship, more intensive guidance is needed to be able to produce application prototypes using figma with UI / UX that is user-friendly, efficient and effective.
