ABSTRACT

The Game Developer Micro credential Program is part of the Independent Campus Independent Learning Program (MBKM), in collaboration with 10 domestic universities and professional associations in the field of game development. Indonesian students can gain knowledge in the field of game development, and develop and produce game products collaboratively that can develop the arena of industrial game development.

The Game Developer Micro credential Program has 5 (five) streams (interests) and 1 (one) capstone project, one of which is Game Project Management. Students who pass the micro credential course will each get a certificate from the stream taken. The result of this micro credential game developer program is a variety of games that can be played on various platforms to choose from for the development stage.
