

## **ABSTRACT**

*Currently, information technology plays an important role in all aspects, ranging from individuals and groups. In groups or organizations, information technology is used to improve service quality and organizational performance. PT. Aplikasi Bisnis Indonesia is one of the corporate organizations that use information technology for organizational development, PT. Aplikasi Bisnis Indonesia which is engaged in IT already has two IT products including AIOACCOUNTING and AIOPOS.ID. Where Aio Accounting is a paid accounting website that aims to help business people and professionals to help manage finances in their business, while Aiopos is a Point Of Sale application that can be used in various MSME businesses. In this research, the author focuses on redesigning the company profile of AIOACCOUNTING.ID, with the hope that this new design can provide a new atmosphere and also a new experience for users.*

*Keywords: Website Redesign, Front-End, Source Code, Aio Accounting.*
