

## **ABSTRACT**

*Training activities are basically activities carried out to train individuals so that they can improve a skill. Training is basically a learning process. The Tegal Regency Communication and Information Office is the implementing element of government affairs in the field of communication and information, government affairs in the field of coding, and government affairs in the field of statistics. The writing methods used include: interviews, namely between the author and the field supervisor to deepen the workflow of the system needed and design it. Then do a literature study, by studying how to use the system and its application in accordance with the needs of the system. Then a discussion is held with colleagues to solve existing problems and divide the tasks of each teammate. The website is built with the Laravel 7 framework. The result of the research is a web system that can input data and register audiences into the database. Tegal. The suggestion from the researcher is that the website system be updated on the route so that the database can be directly accessed from the model.*

**Keywords:** Website, Laravel, Framework
