
ABSTRACT

website is an information media which contains various information and can be accessed by the public. The website can be used to disseminate information on training activities organized by the Tegal Regency Government. Dissemination of information that is still less efficient and effective, using social media such as using WhatsApp, Facebook, Twitter, Instagram and so on. With this website, it is hoped that this training activity will be able to facilitate the dissemination of information on training activities, by combining information on training activities into one and sorting activities by category from the topic of training activities and registration which can be done directly on the website.

Keywords: Website, Training Activities, Information System.
