

## **ABSTRACT**

*MSIB is a program from the Merdeka Campus that facilitates students to carry out their obligations to carry out academic activities outside the study program/campus that has been determined by the Minister of Education & Culture. As one of Merdeka Campus partners, Binar Academy is a pioneer in edtech (education technology) startups that focus on developing digital skills and talents by enhancing the learning experience. Binar Academy has many programs, one of which is Full Stack Web program which runs for ± 6 months. The learning media used in this program are the zoom cloud meeting platform as a learning medium with mentors and Google Class Room as a media provider of Fullstack Web material. Graduates of the Full Stack Web program are focused on being able to create a website-based application using the MERN stock (MongoDB, Express Js, React Js and Node Js). Graduates of this program are expected to have the ability to work as Full Stack Web Developers in national and international companies.*
