

ABSTRACT

One of the target schools for the Teaching Campus program is SDN 1 Pengadegan which is located in Pengadegan Village, Wangon District, Banyumas Regency, Central Java. Before the Campus Teaching 3 program is implemented, students are required to conduct field observations where the program is implemented. The results of these observations can later be used to develop a work program plan in order to fix the obstacles or deficiencies found in the placement schools. With the implementation of this teaching campus activity, students are expected to be able to help the school to overcome problems that arise due to the Covid-19 pandemic.
