Abstract

A website is a place or a site that is useful for loading information or knowledge that can be put or uploaded on the internet network. This website has a wide variety of uses. Starting from spreading information or knowledge, playing games, making a transaction to the latest, namely the online or online learning system. Due to the modern era and also the covid-19 pandemic that is still hitting, of course various kinds of activities as much as possible are carried out online or at home. For that I created a site called "RUANG EDUKASI". The website is useful for conveying information about campuses that aim to educate or tell what is being done on various well-known campuses and there are also some tips and tricks that can be used by students and students of high school and junior high school to make learning activities more effective. Not only that, on the website there is also a consultation feature with various kinds of experts. Starting from psocologists and other experts who hope to help students or students who are confused in determining their interests and talents. Suppose for high school students can consult to determine what major to take when entering college later.
