

ABSTRACT

The application of information technology, especially in primary schools continues to grow rapidly. Teachers play an important role in learning at school. Therefore, teachers must be able to adapt to current technological developments. Elementary school teachers need to be trained to be able to keep up with these developments. Help teachers improve the effectiveness of learning with students and manage administration at school. Google Drive and Quizizz are examples of information technology that can support both. In addition to learning, information technology can also be used to improve teaching and school infrastructure. One of them is the creation of a school website. Websites in primary schools are very useful for conveying information to students and guardians of students. In addition, the improvement of the character for students is very important. One of them by throwing garbage in its place. The level of littering in schools is very high. By doing character education for students, it is expected to foster a level of awareness of throwing garbage in its place. For example, with automatic trash bin can technology. By using this approach, it can be an attraction for students to make garbage in its place.
