

ABSTRACT

The Certified Independent Study and Internship Program is a government program organized to provide students with a well-designed and coordinated learning experience based on the real challenges facing partners/industry. The mission of this program is to prepare students to do their best to enter the industry. The program implemented is an independent study at Alterra Academy, which focuses on, which focuses on software engineering training programs. In this program I chose the path "Become a Flutter Master. From zero to heroes". The result of this program is gaining new knowledge that fits the needs of today's industry. Therefore, this Certified Independent Study and Internship program is a program that really helps students develop and improve their skills so that they can increase the country's intelligence.
