ABSTRACT

Fullstack Web is one of the certified Independent Study programs organized by PT. Lantern Bangsa Bright or better known as Binar Academy. Binar Academy is an edutech startup that focuses on developing digital skills and talents by enhancing the learning experience. The purpose of this program is to provide opportunities for students to learn how to become a FullStack Web Developer who is competent in their field. This program is carried out online for about five months with an independent learning system and learning with a facilitator. The Tech Stacks studied in this program include React JS, Node JS, Express, Postgre SQL, and Mongo DB. There are 8 chapters of material where when the material is finished, there will be challenges that must be completed. At the end of the program, participants are required to work on the Final project in groups with a predetermined theme.

Keywords :Fullstack web, React JS, Express, Node JS, Mongo DB, Postgre
