

ABSTRACT

The Teaching Campus Program which is one form of the implementation of Merdeka Belajar Kampus Merdeka (MBKM) in the form of teaching assistance to empower students in helping the learning process in elementary schools in various villages / cities, one of which is SDI Nurul Huda located in Kampung Bogor, Setia Mulya Village, Tarumajaya Subdistrict, Bekasi Regency, West Java. In this program, the students involved have a responsibility in helping the school in the teaching process, assisting in technological adaptation, and assisting with administration. In addition, students have a responsibility in improving student character and increasing students' learning interest during this pandemic. The result of this program is as an investment of empathy and social sensitivity in students to the problems of community life around them; hone thinking skills in working together across fields of science and the variety of student origins in solving the problems faced; Develop students' insights, character and soft skills; encourage and spur national development by fostering community motivation to participate in development; and enhance the real role and contribution of colleges and students in national development.
