

Abstract

Certified Independent Study Coding with the Android Application Developer learning flow is proposed to produce high-standard talents that are in line with industry standards in the field of Android application development. The learning process is carried out online learning. Where participants must implement the material obtained directly through the project and the tasks that must be completed to complete each material. In addition to hard skills in the field of Android application development, soft skills are also a target of competency for independent study participants, namely preparing a career as a developer, but not limited to self-branding, problem solving, design thinking and collaboration. This program closes with a final project, where participants will work in groups and develop solutions based on android applications.

Keyword : *Android, Application, Developer*
