ABSTRACT

Technology and artificial intelligence (AI-Hacker) is one of the independent study programs organized by PT. Bisa Artifisial Indonesia. In this program, students are fostered to become practitioners in the field of data by having basic knowledge and skills in the field of data science. PT. Bisa Artifisial Indonesia is a digital startup company based on education technology (edutech) that focuses on learning related to artificial intelligence (AI), data science (data science) and other subsets.

Activities carried out in the program consist of scheduled learning, guest learning, independent learning, industrial projects, and soft-skill training. The output of this program is that students can master aspects of establishing a digital startup: AI-Hacker (AI technology, data science, and information technology), AI-Hustler (business, operations and finance) and AI-Hipster (product development, UI). /UX and design).

With the Certified Independent Study and Internship program (MSIB) organized by the Ministry of Education and Culture of the Republic of Indonesia, students can prepare technical and non-technical skills in accordance with their interests in the industrial world as PT. Bisa Artifisial Indonesia for the position of AI-Hacker.
