

ABSTRACT

Thematic KKN is one of the MBKM programs organized by LPPM Telkom Institute of Technology Purwokerto. In this program, students are fostered to contribute ideas for solutions to social issues that occur in society. LPPM is an academic implementing element that carries out some of the main tasks and functions in the field of Research and Community Service. The activities carried out in the Thematic KKN program consist of debriefing, site surveys, work program planning, work program implementation, making final reports, presentation of activity results, value conversion and SKS recognition, and PT reports to PD Dikti. The output of this program is that students can develop and apply the knowledge that has been taught during lectures and gain learning experience in the community, especially in terms of aspects of social interaction with the community. With the MBKM program organized by the Ministry of Education, Culture, Research, and Technology of the Republic of Indonesia, students can hone skills according to their talents and interests by going directly into the world of work as contained in the Thematic KKN program. The institution that is the partner of the Thematic KKN program is Grujugan Village, which is located in the Petanahan sub-district, Kebumen district. Based on the location survey, the problem to be raised is regarding the digitization of the grujugan village.
