ABSTRACT

In the digital era, technological developments are very rapid, considering that so many developments have been made that make it easier for someone to carry out an activity. Likewise with the people in Brebes Regency, there are still many people who have difficulty finding information about Brebes Regency, especially in remote villages because of the lack of sources of information obtained. Therefore, the Office of Communication, Informatics and Statistics of the Brebes Regency designed an information tool in the form of the HumasTv website to make it easier for the Regency community to find information. Making the HumasTv website is done using wordpress cms where the website contains information on tourism, culinary, and others. The results of this Field Work Practice are expected to be able to make it easier for the people of Brebebs Regency to get information that is informative and can be accessed whenever and wherever they are.
