Bagaskara Art Studio is a studio that provides training in acting, pantomime, painting and dance classes. Located in Tanjunganom Village, Kaliwiro District, Wonosobo Regency, Central Java. Currently, Bagaskara Art Studio does not have a company profile website, so this research will design and build a company profile website for Bagaskara Wonosobo Art Studio using a PHP framework that focuses on Laravel and Bootstrap as well as the MySQL Database. The method used in this research is Extreme Programming. The research results include showing the homepage, services, news, portfolio, as well as my account which displays information so that it can advance the Bagaskara art studio. This website was built using the Backend Hypertext Preprocessor (PHP) with the Laravel framework, Frontend CSS with the Bootstrap framework and MySQL database.

Keywords : Company Profile, Laravel, MySQL, PHP
