Dear Mr Prof. Maode Ma

Editor-In-Chief Journal of Communications

We wish to submit an original research article entitled "Deep Learning Algorithm Models for Spam Identification on Cellular Short Message Service" for consideration for the Journal of Communications.

We confirm that this work is original and has not been published elsewhere, nor is it currently under consideration for publication elsewhere.

To classify and analyze SMS spam or ham, the research uses the Support Vector Machine, Multinomial Naïve Bayes, and Decision Tree methods. The three methods chosen are used to compare and give insight into the algorithms and determine the best solution. Support Vector Machine emphasizes word relationship correlation, and Multinomial Naïve Bayes does not have word dependence on one another. At the same time, Decision Tree is more about dividing words into classes, especially in Indonesia. This manuscript is appropriate for publication in the Journal of Communications because it corresponds to the journal's aim and scope.

We have no conflict of interest to disclose.

Please address all correspondence concerning this manuscript to me at alfin@ittelkom-pwt.ac.id or alfin.hikmaturokhman@gmail.ac.id

I appreciate your consideration of this manuscript.

Sincerely,

Deep Learning Algorithm Models for Spam Identification on Celular Short Message Service n
