Website is an option for companies as a information system and a promotion. MilkMax Milkshake also has a website that used to find information about the company, flavors, outlet address, and also feedback.

Research are using the waterfall method and information search is used to search the data. After doing the data search, there is a function that doesn't work, is a edit menu and also need to add a page for vision mission on the MilkMax Milkshake website.

Result of this research is a website management which consist of improving edit menu function and adding vision mission page was succesful until a testing stage.

Based on this research, it can be seen that managing and improving the feature of the website, especially MilkMax Milkshake is one way to improve service to consumers effectively and is also expected to producing a accurate information.
