Milkmax Milkshake is a company engaged in the production and sale of processed milk (milkshakes) that has been established since 2013, and it has been registered as a brand at the Ministry of Law and Human Rights. Milkmax Milkshake has a website that is used for information systems in the company. There are problems that occur on the Milkmax Milkshake website, namely there are bugs in several features that cause features to not function on the admin display page. Therefore, this time PKL/KP is fixing bugs on the Milkmax Milkshake website and adding several features and menus. The result of this activity is managing the website which consists of improving the edit menu function, adding vision and mission pages, and adding video features

Keywords: **HTML, Milkmax Milkshake, PHP, Sublime Text,** *Website*
