Field Work Practice that can be called Practical Work is a compulsory subject from one of the courses in each study program and is a requirement for completing the Bachelor of Information Systems education at the Telkom Institute of Technology, Purwokerto. At the end of the field practice work activities, students are required to compile a report and the report will be used as a basis for giving an assessment. The website is a page that is visited by many people, because it displays a lot of information. The Office of Dinas Pemberdayaan Masyarakat dan Desa *is an implementing element of Government affairs in the field of community and village empowerment. This study aims to provide solutions to problems at the Community and Village Empowerment Service by providing a user interface (UI) for the system. The author provides solutions for creating an E-SURAT website. Before creating an E-SURAT website, it is necessary to design the appearance of the website. So from the results of interviews with the PMD Service, the author designed the appearance of the E-SURAT website which later could become a reference for the* Dinas Pemberdayaan Masyarakat dan Desa. *The website system has a menu including business travel request letters, birth permits, employee leave letters, application for internships.*

Keywords : user interface, website, system, figma, Dinas Pemberdayaan Masyarakat dan Desa
