

## ***ABSTRACT***

### ***COMPANY PROFILE WEBSITE DESIGN USING THE PROTOTYPE METHOD AT PT SINAR GRAGE JAYA, CIREBON DISTRICT***

*Author :*

Ramadhan Fauzan Islamil Haq

*The use of internet media has a lot of great influence in presenting information. With the internet media information can be quickly and easily obtained and disseminated. The purpose of this Field Work Practice is to need a website-based company profile that can facilitate the search for a company. In preparing the Field Work Practice report the method to be used is the prototype method and the writing method used includes: observation, namely conducting direct practice in the field; interview, namely direct question and answer with the field supervisor; and review the literature, namely including material, opinions into the discussion with the same problem. The problem faced is the lack of information media in the introduction of PT Sinar Grage Jaya. Therefore, with the creation of this website, PT Sinar Grage Jaya can provide information easily. The conclusion of the Field Work Practice report is to provide a discussion that has been carried out on the PT Sinar Grage Jaya website. Suggestions from the Field Work Practice report are that it can provide a website that is easy to convey information from PT Sinar Grage Jaya.*

***Keywords - Website, Information, Prototype***
