CV. Kreasi Mandiri is a business entity that serves several types of business activities, especially in the technology sector. One of them is Hitbox Creative Studio, which is included in the CV section. Independent Creation. Hitbox Creative Studio is an event organizer that handles events on the technology side, for example game products and livestreams. The PMJC website must be tested to ensure that all processes or functions that are still inside run in sync with their functions, the test was carried out using the black box testing method on the front end and back end. The black box testing technique makes it possible to select a set of input conditions that will fully fulfill all functional requirements for a program. 7 frontend & backend features, 26 functionalities on the PMJC website, 6 out of 26 functionalities still fail when testing. Everything based on the PMJC website has been successful and can be said to be in sync with what is needed. Some features that still fail to be needed can be taken into consideration based on the website manufacturer team's side so they can be fixed.
