The increasingly rapid information technology makes a change from the old system that is manual to a new system that is simpler to making websites. One of them is website development using wordpress. PT. Gamatechno Indonesia is a provider of information technology solutions for government, business and transportation institutions. PT Gamatechno is divided into several divisions, one of which is the GOV division. To conduct business and market its products in these divisions required the creation and design of a website.

Website design will be done using Wordpress with XAMPP to run local hosts and MySql to store databases. And image editing applications using Adobe Photoshop. The results will be transferred using WinSCP to PT Kloxo-Mr PT. Gamatechno Indonesia's *hosting*.

This website is expected to help consumers and administrators in ordering products provided by PT. Gamatechno Indonesia.

Keywords: Website, MySQL, Adobe Photoshop, Kloxo-Mr, WinSCP
