Zidan Yazid Himawam

*Banyumas Regency belongs to the Central Java Province, which is composed of 27 districts and 331 villages. During the period from 2006 to 2009, the number of small businesses increased from 643 to 717. One of the obstacles in the current Banyumas MSMEs is the lack of dissemination of information about MSMEs in marketing their products. So, the solution to the problems that occur is by designing a website which is expected to help village communities, MSMEs and village governments in their management. PT. Wiratek Solusi Asia works with various institutions and has produced several websites, one of which. Banyumas Village Results Information System (SIHASA) website. The SIHASA Banyumas application that is made will be very useful to the community, especially village communities in Banyumas Regency and of course it will also help village governments in Banyumas Regency in managing village output and SMEs in Banyumas Regency. The Banyumas Regency Village Results Information System can be used properly and can adjust the functions of the application system work. Then it is better to do maintenance, choose domain and hosting the appropriate/compatible website and will have high traffic.*
