Baznas Banyumas is a website created by Dinas Komunikasi dan Informatika Banyumas Regency to assist the residents of Banyumas in carrying out their charitable activities, such as almsgiving, voluntary charity, and zakat. However, the appearance of Baznas Banyumas' website is quite simple and not attractive enough for the community to use its services. Therefore, it is necessary to improve the website's appearance to make it more fresh and appealing to the public. With an attractive and user-friendly design, it is hoped that the Banyumas community will be able to better understand the information contained on the website and become more interested in carrying out charitable activities such as almsgiving, voluntary charity, and zakat. Additionally, Baznas Banyumas' website is equipped with login and registration features, so that visitors to the website can carry out charitable activities more easily and effectively.
