Title Page  
Welcome Message from General Chair  
Committee  
Program Schedule  
Table of Contents

### ***Keynote Speech***

Keynote 1

#### **Network slicing: from definition to evolution towards 6G**

Carla Raffaelli, M.Sc., Ph.D

Keynote 2

#### **Robotic Aerial Small Cells for Efficient 6G Network Densification**

Dr. Vasilis Frederikos

Keynote 3

#### **Artificial Intelligence for Autonomous Vehicle**

Dr. Nolang Fanani, B.Eng., M.Sc

Keynote 4

#### **New Generation Microwave Synthesizer Key Design Technologies and Advanced Testing Trend**

Shashiv Phadnis

<b>1570812289</b>	<b>Design and Analysis of Optical Fiber Network Jakarta - Singapore - Nusantara via Karimata Strait</b>	<b>1</b>
	Muhammad Rendra Perdana Kusuma Djaka, Fajar Aulia Rachman, Herry Tony Andhyka and Catur Apriono (Universitas Indonesia, Indonesia)	
<b>1570846760</b>	<b>Terahertz Antenna-coupled Microbolometer: Impact of High Heater Resistance</b>	<b>9</b>
	Arie Pangesti Aji (Universitas Indonesia, Indonesia); Hiroaki Satoh (Shizuoka University, Japan); Catur Apriono and Eko Tjipto Rahardjo (Universitas Indonesia, Indonesia); Hiroshi Inokawa (Shizuoka University, Japan)	
<b>1570849139</b>	<b>Modeling of Multiplexing Indoor Light Fidelity (Li-Fi) Technology Using Movable LED Panel</b>	<b>14</b>
	I Wayan Mustika (Universitas Gadjah Mada, Indonesia); Fauza Khair and Anggun Fitriani Isnawati (Institut Teknologi Telkom Purwokerto, Indonesia); Arrizky Ayu Faradila Purnama (Institute of Technology Telkom Surabaya & Faculty of Electrical Technology and Intelligent Industry, Indonesia); Dwi Edi Setyawan (Institut Teknologi Telkom Surabaya, Indonesia)	

<b>1570825645</b>	<b>Energy Efficient Cooperative Strategy over LEO Satellite Internet of Things</b>	<b>21</b>
	Kaiwei Wang (No 38 Research Institute, China Electronics Technology Group Corporation, China)	
<b>1570826871</b>	<b>Link Budget Analysis for a 3U Nanosatellite Operating At S-band</b>	<b>27</b>
	Habib Idmouida (Mohammed V University in Rabat, Morocco & University Center for Research in Space Technologies, Mohammedia School of Ingeniers, Morocco)	
<b>1570806826</b>	<b>Reversible Data Hiding using Pixel-Value-Ordering and Difference Expansion in Digital Images</b>	<b>33</b>
	Ntivuguruzwa Jean De La Croix and Chaidir Islamy (Institut Teknologi Sepuluh Nopember, Indonesia); Tohari Ahmad (Institut Teknologi Sepuluh Nopember (ITS), Indonesia)	
<b>1570816873</b>	<b>A Review Paper: Accuracy of Machine Learning for Depression Detection in Social Media</b>	<b>39</b>
	Alya Melati Putri, Kevin Wijaya and Owen Salomo (Binus University, Indonesia); Anderies Anderies (BINUS University, Indonesia); Alexander Agung Santoso Gunawan (Bina Nusantara University & University of Indonesia, Indonesia)	
<b>1570817330</b>	<b>Click Bait Detection for Internet News Title with Deep Learning Feed Forward</b>	<b>46</b>
	Berlian Al Kindhi (Institut Teknologi Sepuluh Nopember, Indonesia); Sean John Rawlings (Cardiff Metropolitan University, United Kingdom (Great Britain))	
<b>1570849653</b>	<b>A Decision Tree Knowledge-based System for Reviewing of Research Ethics Protocol</b>	<b>50</b>
	Ratih Nur Esti Anggraini (Intelligent Systems Lab, University of Bristol, United Kingdom (Great Britain) & Institut Teknologi Sepuluh Nopember, Indonesia); Nurul Fajrin Ariyani, Abdullah Faqih Septiyanto, Zahra Meilani and Riyanarto Sarno (Institut Teknologi Sepuluh Nopember, Indonesia)	
<b>1570825403</b>	<b>Systematic Literature Review: Collaborative Filtering Algorithms for Recommendation Systems</b>	<b>56</b>
	Michael The Hadinata, Hans Andika, William Huang and Anderies Anderies (BINUS University, Indonesia); Irene Anindaputri Iswanto (Bina Nusantara University, Indonesia)	
<b>1570825606</b>	<b>Intrusion Detection using Support Vector Machine on Internet of Things Dataset</b>	<b>62</b>
	Rifky Aditya, Hilal H. Nuha and Sidik Prabowo (Telkom University, Indonesia)	
<b>1570825636</b>	<b>Flood Identification with Fuzzy Logic Based on Rainfall and Weather for Smart City Implementation</b>	<b>67</b>

Berlian Al Kindhi (Institut Teknologi Sepuluh Nopember, Indonesia)

<b>1570827576</b>	<b>Performance Comparison of Machine Learning Algorithms for Student Personality Classification</b>	<b>73</b>
	Didi Supriyadi (Diponegoro University, Indonesia & Institut Teknologi Telkom Purwokerto, Indonesia); Purwanto Purwanto (Universitas Diponegoro, Indonesia); Budi Warsito (Diponegoro University, Indonesia)	
<b>1570829856</b>	<b>Improvement Object Detection Algorithm Based on YoloV5 with BottleneckCSP</b>	<b>79</b>
	Aria Hendrawan (Information System School of Postgraduate Universitas Diponegoro, Indonesia & Universitas Semarang, Indonesia); Rahmat Gernowo, Oky Nurhayati, Budi Warsito and Adi Wibowo (Information System School of Postgraduate Diponegoro University, Indonesia)	
<b>1570836276</b>	<b>Intrusion Detection using Deep Neural Network Algorithm on the Internet of Things</b>	<b>84</b>
	Syariful Ikhwan (Institut Teknologi Telkom Purwokerto, Indonesia); Adi Wibowo and Budi Warsito (Diponegoro University, Indonesia)	
<b>1570836614</b>	<b>Integration of Decision Tree-Fuzzy Algorithm for Decision Support System in Air Force Operation</b>	<b>88</b>
	Hendri Himawan Triharminto (Indonesian Air Force Academy, Indonesia); Lenny Iryani (Politeknik Negeri Bandung, Indonesia)	
<b>1570808247</b>	<b>Design and Implementation of On-Body Textile Antenna for Bird Tracking at 2.4 GHz</b>	<b>94</b>
	Hasri Ainun Harris, Levy Olivia Nur and Radial Anwar (Telkom University, Indonesia)	
<b>1570816865</b>	<b>Outage Analysis of UAV-assisted Co-operative communication system with imperfect SIC</b>	<b>100</b>
	Anju Rs (National Institute of Technology, Trichy, India); Anandpushparaj J (National Institute of Technology, Trichirappalli, India); Muthu Palanivel Chidambara Nathan (National Institute of Technology, India)	
<b>1570825046</b>	<b>HPA Rapp Model Nonlinear Distortion Effect Mitigation Technique on GFDM System</b>	<b>107</b>
	Ari Endang Jayati (Institut Teknologi Sepuluh Nopember & Universitas Semarang, Indonesia)	
<b>1570825607</b>	<b>System Usability Scale Analysis of Infusion Fluid Level Monitoring And Notification System Using IoT</b>	<b>112</b>
	Handika Jaladara, Rizka Reza Pahlevi and Hilal H. Nuha (Telkom University, Indonesia)	
<b>1570805131</b>	<b>The Performance Analysis of Hybrid SDN-IP Reactive Routing on ONOS Controller in Tree Topologies</b>	<b>118</b>

Bongga Arifwidodo (Telkom Institute of Technology Purwokerto, Indonesia);  
Donny Arief Oktavian and Jafaruddin Gusti Amri Ginting (IT Telkom  
Purwokerto, Indonesia)

- |                   |   |            |
|-------------------|---|------------|
| <b>1570812204</b> | <b>Auto Discover Virtual Private Network Using Border Gateway Protocol Route Reflector</b>  | <b>123</b> |
|                   | Setiyo Budiyanoto, Ch Aprihansah, Lukman Silalahi and Imelda Simanjuntak (Universitas Mercu Buana, Indonesia); Freddy Artadima Silaban (Universitas Mercu Buana & Indones, Indonesia); Agus Rochendi (Badan Riset dan Inovasi Nasional, Indonesia)                          |            |
| <b>1570812251</b> | <b>QoS Analysis on VoIP with VPN Using SSL and L2TP IPsec Method</b>  | <b>130</b> |
|                   | Erryc Darmawan, Setiyo Budiyanoto and Lukman Silalahi (Universitas Mercu Buana, Indonesia)  |            |
| <b>1570812259</b> | <b>Secret Image Sharing and Steganography based on Fuzzy Logic and Prediction Error</b>   | <b>137</b> |
|                   | Chaidir Islamy (Institut Teknologi Sepuluh Nopember, Indonesia); Tohari Ahmad (Institut Teknologi Sepuluh Nopember (ITS), Indonesia); Royyana Ijtihadie (Institut Teknologi Sepuluh Nopember, Indonesia)  |            |
| <b>1570817172</b> | <b>Adapting ISO 17025 to Enrich QoS as Quality Measurement on Internet of Medical Things</b>  | <b>143</b> |
|                   | Muhammad Yusro, Nor Safira Azlyn and Sevia Purnama (Institut Teknologi Telkom Purwokerto, Indonesia)  |            |
| <b>1570849890</b> | <b>Marine Vessels Detection on Very High-Resolution Remote Sensing Optical Satellites</b>   | <b>149</b> |
|                   | Bill Van Ricardo Zalukhu and Arie Wahyu Wijayanto (Politeknik Statistika STIS, Indonesia); Muhammad Iqbal Habibie (National and Research Innovation Agency (BRIN), Indonesia)   |            |
| <b>1570839448</b> | <b>An Implementation of Large Scale Hate Speech Detection System for Streaming Social Media Data</b>  | <b>155</b> |
|                   | Doan Long An (University of Information Technology, Vietnam); Thao Phuong Nguyen (University Information Technology, Vietnam); Trong-Hop Do (University of Information Technology, Ho Chi Minh City & Vietnam National University, Ho Chi Minh City, Vietnam)               |            |
| <b>1570839816</b> | <b>A Practical Real-Time Flight Delay Prediction System using Big Data Technology</b>   | <b>160</b> |
|                   | Tri Minh Vo and Vu Tran Trieu (University of Information Technology, Vietnam); The Duc Pham (University Information of Technology, Vietnam); Trong-Hop Do (University of Information Technology, Ho Chi Minh City & Vietnam National University, Ho Chi Minh City, Vietnam) |            |
| <b>1570841530</b> | <b>Design and Testing on Migration of Remiss-Supply in Banking System to Microservice Architecture</b>  | <b>168</b> |

Alwi Maulana (Institut Teknologi Telkom Purwokerto, Indonesia); Pradana Ananda Raharja (Institut Teknologi Telkom Purwokerto, Indonesia & Fakultas Informatika, Indonesia)

- 1570843900 School Zoning System for Student Admission using Constrained K-Means Algorithms** 174  
 Andi Alviadi Nur Risal (Hasanuddin University, Indonesia); Zahir Zainuddin (University of Hasanuddin, Indonesia); Muhammad Niswar (Universitas Hasanuddin, Indonesia)
- 1570844448 Classifying Leaf Types using the Artificial Neural Network Method by Optimizing Parameter Iteration** 179  
 M Alfian Dzikri, S Ayu Septianingrum, Nova Rijati and Pujiono Pujiono (Universitas Dian Nuswantoro, Indonesia)
- 1570844565 Ensemble of the Distance Correlation-Based and Entropy-Based Sensor Selection for Damage Detection** 183  
 Jimmy Tjen, Genrawan Hoendarto and Tony Darmanto (Universitas Widya Dharma Pontianak, Indonesia)
- 1570844733 Mandibular segmentation on panoramic radiographs with CNN Transfer Learning** 190  
 Nur Nafi'iyah, Chastine Fatichah and Darlis Herumurti (Institut Teknologi Sepuluh Nopember, Indonesia); Eha Renwi Astuti (Universitas Airlangga, Indonesia); Esa Prakasa (BRIN, Indonesia)
- 1570845477 Clustering Stress Reactivity based on Heart Rate Variability during Acute Mental Stress Task** 195  
 Auditya Purwandini Sutarto, Nailul Izzah and Mohamad H Hariyadi (Universitas Qomaruddin, Indonesia)
- 1570846522 GRU-MF: A Novel Appliance Classification Method for Non-Intrusive Load Monitoring Data** 200  
 Aji Gautama Putrada, Nur Alamsyah, Syafrial Fachri Pane and Mohamad Nurkamal Fauzan (Telkom University, Indonesia)
- 1570849999 DCGAN-based Medical Image Augmentation to Improve ELM Classification Performance** 206  
 Rando Rando, Noor Akhmad Setiawan and Adhistya Erna Permanasari (Universitas Gadjah Mada, Indonesia); Riries Rulaningtyas (Airlangga University, Indonesia); Andriyan B. Suksmono (Bandung Institute of Technology, Indonesia); Imas Sukaesih Sitanggang (Bogor Agricultural University, Indonesia)
- 1570847133 n-Mating Effect on Genetic Algorithm-Based Clustering Performance for Hotspots Data** 212  
 Rani Rotul Muhima (Institut Teknologi Adhi Tama Surabaya, Indonesia)

<b>1570850157</b>	<b>A study of Convolution Neural Network Based Cataract Detection with Image Segmentation</b> Nina Sevani, Hendrik Tampubolon, Jeremy Wijaya, Lukas Cuvianto and Albert Salomo (Krida Wacana Christian University, Indonesia)	<b>216</b>
<b>1570848940</b>	<b>A Novel License Plate Image Reconstruction System using Generative Adversarial Network</b> Vy-Hao Phan and Minh-Quan Ha (University of Information Technology, Vietnam); Trong-Hop Do (University of Information Technology, Ho Chi Minh City & Vietnam National University, Ho Chi Minh City, Vietnam)	<b>222</b>
<b>1570848944</b>	<b>A Small-Scale Temperature Forecasting System using Time Series Models Applied in Ho Chi Minh City</b> Nam Quoc Nguyen, Thang Chau Phan, Khanh Phuoc Bao Truong, Hong Thi Thuy Dang and Trong-Hop Do (University of Information Technology, Ho Chi Minh City & Vietnam National University, Ho Chi Minh City, Vietnam)	<b>229</b>
<b>1570825685</b>	<b>Linear Filter Design for FBMC-OQAM Transceiver</b> Davide Mattera (Università degli Studi di Napoli Federico II, Italy); Mario Tanda (Università di Napoli Federico II, Italy)	<b>235</b>
<b>1570825687</b>	<b>Triangular Patch Antenna Using Coplanar Waveguide and DGS Techniques for 5G Communications</b> Nurhayati Nurhayati, Mohammad Iyo Agus Setyono and Alga Mardhiarta Yundha Tama (Universitas Negeri Surabaya, Indonesia)	<b>241</b>
<b>1570825701</b>	<b>Coplanar Vivaldi Antenna with wave slot structure for RADAR application</b> Nurhayati Nurhayati (Universitas Negeri Surabaya, Indonesia); Eko Setijadi (Institut Teknologi Sepuluh Nopember, Indonesia)	<b>247</b>
<b>1570826885</b>	<b>Performance Evaluation of LoRa 915 MHz for Health Monitoring with Adaptive Data Rate</b> Puput Dani Prasetyo Adi (National Research and Innovation Agency (BRIN-RI), Indonesia)	<b>252</b>
<b>1570832619</b>	<b>Network Planning and Performance Analysis for 5G mmWave in Urban Areas</b> Nasaruddin Nasaruddin (Syiah Kuala University, Indonesia); Nuzuar Rafli and Yunida Yunida (Universitas Syiah Kuala, Indonesia); Rusdha Muharrar (Syiah Kuala University, Indonesia)	<b>258</b>
<b>1570833435</b>	<b>Performance analysis of FBMC-PAM systems in frequency-selective Rayleigh fading channels in the pres</b> Davide Mattera (Università degli Studi di Napoli Federico II, Italy); Mario Tanda (Università di Napoli Federico II, Italy)	<b>264</b>
<b>1570836452</b>	<b>A 4x4 Microstrip Feeder Antenna Design using Dolph-Chebyshev for Receiving Himawari-8 Satellite Data</b>	<b>270</b>

	Muhammad Riza Darmawan and Catur Apriono (Universitas Indonesia, Indonesia)	
<b>1570836864</b>	<b>LEO Satellite Authentication using Physical Layer Features with Support Vector Machine</b>	<b>277</b>
	Mohammed Hammouda and T. Aaron Gulliver (University of Victoria, Canada)	
<b>1570841692</b>	<b>Designing QPSK Modulator Using LTspice-Based Discrete Components</b>	<b>283</b>
	Andicho Haryus Wirasapta (Gadjah Mada University, Indonesia); Prpto Nugroho (Universitas Gadjah Mada, Indonesia); Sigit Basuki Wibowo (Gadjah Mada University, Indonesia)	
<b>1570843986</b>	<b>Threshold-Based Physical Layer Authentication for Space Information Networks</b>	<b>289</b>
	Mohammed Hammouda and T. Aaron Gulliver (University of Victoria, Canada)	
<b>1570844609</b>	<b>FER Polar Codes Performances Using 5G Broadband Channel with CP-OFDM Techniques at 2.3 GHz Frequency</b>	<b>294</b>
	Reni Dyah Wahyuningrum (Institut Teknologi Telkom Purwokerto, Indonesia); Khoirun Ni'amah (Institut Teknologi Telkom Purwokerto & Telkom University, Indonesia); Solichah Larasati and Shinta Romadhona (Institut Teknologi Telkom Purwokerto, Indonesia)	
<b>1570846100</b>	<b>Recent Trends in the Reconfigurable Intelligent Surfaces (RIS): Active RIS to Brain-controlled RIS</b>	<b>299</b>
	Muhammad Miftahul Amri (Sungkyunkwan University, Korea (South))	
<b>1570846106</b>	<b>Indoor Positioning System for Campus Building Based on WLAN Fingerprint</b>	<b>305</b>
	Mohammad Edar Paradise Wibowo, Mohammad Raudya Hananditya and Firdaus Firdaus (Universitas Islam Indonesia, Indonesia); Noor Azurati Ahmad and Azlan Adi (Universiti Teknologi Malaysia, Malaysia)	
<b>1570846640</b>	<b>Techno-Regulation Analysis of Micro Operator in Industrial Area</b>	<b>310</b>
	Melati Sabila Putri, Bambang Setia Nugroho and Helni Jumhur (Telkom University, Indonesia)	
<b>1570851068</b>	<b>Private 5G Network Capacity and Coverage Deployment for Vertical Industries: Case Study in Indonesia</b>	<b>317</b>
	Asri Wulandari Asri (Politeknik Negeri Jakarta, Indonesia); Alfin Hikmaturokhman (Institut Teknologi Telkom Purwokerto & Universitas Indonesia, Indonesia); Marfani Marfani (PT Telkomsel, Indonesia)	
<b>1570822994</b>	<b>Performance Comparison of Web Server Application on Single Board Computer</b>	<b>323</b>
	Mega Pranata (Institut Teknologi Telkom Purwokerto); Aditya Wijayanto and Muhammad Fajar Sidiq (Institut Teknologi Telkom Purwokerto, Indonesia)	

<b>1570825051</b>	<b>Tracking Device for The Mountaineers Using GPS</b> Ari Endang Jayati (Institut Teknologi Sepuluh Nopember & Universitas Semarang, Indonesia)	<b>328</b>
<b>1570825635</b>	<b>Sybil Attack Detection on ITS-V2X System using a Realistic Traffic Model-based Approach</b> Afdhal Afdhal, Ahmadiar Ahmadiar and Ramzi Adriman (Universitas Syiah Kuala, Indonesia)	<b>333</b>
<b>1570825665</b>	<b>Deep Feature Selection for Machine Learning based Attack Detection Systems</b> Minh-Tri Huynh, Hoang-Trung Le, Xuan-Ha Nguyen and Le Kim-Hung (University of Information Technology, Vietnam)	<b>339</b>
<b>1570846225</b>	<b>LoRA Gateway Coverage and Capacity Analysis in Urban Area For IoT Smart Gas Meter Demand</b> Kalam Adhiansyah Lutfie (University of Indonesia, Indonesia); Prima Dewi Purnamasari and Dadang Gunawan (Universitas Indonesia, Indonesia); I Ketut Agung Enriko (Institut Teknologi Telkom Purwokerto & PT Telkom Indonesia, Indonesia)	<b>345</b>
<b>1570829674</b>	<b>Feasibility Evaluation of Compact Flow Features for Real-time DDoS Attacks Classifications</b> Muhammad Fajar Sidiq and Nanda Iryani (Institut Teknologi Telkom Purwokerto, Indonesia); Akbari Indra Basuki (National Research and Innovation Agency (BRIN), Indonesia); Arief Indriarto Haris and Rd Angga Ferianda (BRIN, Indonesia)	<b>350</b>
<b>1570836485</b>	<b>An IoT-Based System for Water Quality Monitoring and Notification System of Aquaculture Prawn Pond</b> Ramzi Adriman, Maya Fitria and Afdhal Afdhal (Universitas Syiah Kuala, Indonesia)	<b>356</b>
<b>1570846836</b>	<b>Design of Spectrum analyzer Android-based Instructional Media for Vocational High School Student</b> Assa K Rohana and Adythia E Nugraha (SMK TELKOM JAKARTA, Indonesia); Rohani Cristyn (Penabur Christian Senior High School Kota Wisata, Indonesia); Kukuh Harsanto and Garrison Lee (SMK TELKOM JAKARTA, Indonesia)	<b>361</b>
<b>1570853669</b>	<b>Portable Air Quality Monitoring System in ANN Using Combination Hidden Layer Hyperparameters</b> Haniah Mahmudah, Cindy Ulan Purwanti, Rahardhita Sudibyo, Ilham Dwi Pratama and Nur Menik Rohmawati (Politeknik Elektronika Negeri Surabaya, Indonesia)	<b>368</b>

<b>1570853744</b>	<b>Performance of Deep Learning Benchmark Models on Thermal Imagery of Pain through Facial Expressions</b>	<b>374</b>
	Raihan Islamadina (Universitas Islam Negeri Ar Raniry, Indonesia); Khairun Saddami (Universitas Syiah Kuala, Indonesia); Maulisa Oktiana (Syiah Kuala University, Indonesia); Taufik F. Abidin (Universitas Syiah Kuala, Indonesia); Rusdha Muharar (Syiah Kuala University, Indonesia); Fitri Arnia (Universitas Syiah Kuala, Indonesia)	
<b>1570854233</b>	<b>Sliding Mode Control of Angular Speed DC Motor System with Parameter Uncertainty</b>	<b>380</b>
	Alfian Ma'arif (Universitas Ahmad Dahlan, Indonesia); Iswanto Iswanto, Is (Universitas Muhammadiyah Yogyakarta, Indonesia); Aninditya Anggari Nuryono, Aan (Mulia University, Indonesia); Nia Maharani Raharja (Universitas Gadjah Mada, Indonesia); Hari Maghfiroh (Universitas Gadjah Mada & IEEE SB UGM, Indonesia)	
<b>1570855991</b>	<b>Oil Palm Leaf Disease Detection on Natural Background Using Convolutional Neural Networks</b>	<b>388</b>
	Anindita Septiarini and Hamdani Hamdani (Universitas Mulawarman, Indonesia); Eko Junirianto (Politeknik Pertanian Negeri Samarinda, Indonesia); Mohammad Sofyan S Thayf (STMIK KHARISMA Makassar, Indonesia); Gandung Triyono (Universitas Gadjah Mada, Indonesia); Henderi Henderi (University of Raharja, Indonesia)	
<b>1570846652</b>	<b>Decision Making via Game Theory for Autonomous Vehicles in the Presence of a Moving Obstacle</b>	<b>393</b>
	Marina Vicini, Sercan Albut and Elvina Gindullina (University of Padova, Italy); Leonardo Badia (Università degli Studi di Padova, Italy)	
<b>1570849331</b>	<b>Hiding Document Format Files Using Video Steganography Techniques With Least Significant Bit Method</b>	<b>399</b>
	Tufail Akhmad Satrio, Wahyu Adi Prabowo and Trihastuti Yuniati (Institut Teknologi Telkom Purwokerto, Indonesia)	
<b>1570850000</b>	<b>Error Rate Performance of Equatorial HF Skywave MIMO Packet Radio</b>	<b>407</b>
	Elsa Lolita Anggraini, Gamantyo Hendrantoro and Titiek Suryani (Institut Teknologi Sepuluh Nopember, Indonesia)	
<b>1570850070</b>	<b>Analysis of Microwave Absorber Using Sugarcane Bagasse for 27 - 29 GHz Frequency</b>	<b>411</b>
	Yougha Budi Prahmana, Ayu Mika Sherila and Umairah Umairah (Universitas Mercu Buana, Indonesia); Erfan Handoko (Universitas Negeri Jakarta, Indonesia); Mudrik Alaydrus (Universitas Mercu Buana, Indonesia)	

1570848572	<b>Trajectory and Power Optimization for Buffer-Assisted Amplify-and-Forward UAV Relay</b>	415
	Naga manoj Makkena (International Institute of Information of Technology, Hyderabad, India); P Ubaidulla (International Institute of Information Technology, India)	
1570851329	<b>Robustness Analysis of 5-Element Overlapped Linear Subarrays for Wide Angular Scanning Applications</b>	422
	Titus Cahya Pertiwi (Institut Teknologi Sepuluh Nopember, Indonesia); Fannush Shofi Akbar (Institut Teknologi Telkom Surabaya, Indonesia); Gamantyo Hendratoro (Institut Teknologi Sepuluh Nopember, Indonesia); Leo P. Ligthart (em. prof. Delft University of Technology & Universitas Indonesia, Beijing Institute of Technology, ITS Surabaya, The Netherlands)	
1570843062	<b>Implementation of the Internet of Things for Flood Mitigation and Environmental Sustainability</b>	426
	Muhamad Azrino Gustalika (Institut Teknologi Telkom Purwokerto, Indonesia); Sudianto Sudianto (Telkom Institute of Technology Purwokerto, Indonesia); Diandra Chika Fransisca, Fahrudin Mukti Wibowo, Mas Aly Afandi and Reni Dyah Wahyuningrum (Institut Teknologi Telkom Purwokerto, Indonesia)	
1570843781	<b>DRL-Based Secure Beamforming for Hybrid-RIS Aided Satellite Downlink Communications</b>	432
	Quynh Tu Ngo, Khoa Tran Phan, Abdun Mahmood and Wei Xiang (La Trobe University, Australia)	
1570854156	<b>Investigated insider and outsider attacks on the federated learning system</b>	438
	Ibraim Ahmed (University of Mosul, Iraq & College of Science, Iraq); Manar Kashmoola (Mosul University, Iraq)	
1570849141	<b>Analysis of Transmitter Half Angle and FOV Variations on Multiplexing Indoor Li-Fi Communication</b>	444
	I Wayan Mustika (Universitas Gadjah Mada, Indonesia); Fauza Khair and Anggun Fitriani Isnawati (Institut Teknologi Telkom Purwokerto, Indonesia); Dwi Edi Setyawan (Institut Teknologi Telkom Surabaya, Indonesia); Arrizky Ayu Faradila Purnama (Institute of Technology Telkom Surabaya & Faculty of Electrical Technology and Intelligent Industry, Indonesia)	
1570847645	<b>Performance Analysis of Eigenface Method for detecting organic and non organic waste type</b>	451
	Aditya Wijayanto (Institut Teknologi Telkom Purwokerto, Indonesia); Afifah Dwi Ramadhani (Politeknik Elektronika Negeri Surabaya, Indonesia); Muhamad Azrino Gustalika and Alon Jala Tirta Segara (Institut Teknologi Telkom Purwokerto, Indonesia)	

<b>1570850150</b>	<b>Soft FFR Scheme for Distributed D2D Communication in Multicell of Cellular Communication Networks</b>	<b>456</b>
	Soraida Sabella, Misfa Susanto, Fx Arinto Setyawan and Fadil Hamdani (University of Lampung, Indonesia)	
<b>1570851744</b>	<b>New Approach of Ensemble Method to Improve Performance of IDS using S-SDN Classifier</b>	<b>463</b>
	Amarudin Amarudin (Universitas Gadjah Mada & Universitas Teknokrat Indonesia, Indonesia); Ridi Ferdiana (Universitas Gadjah Mada, Indonesia); Widy Widyawan (Gadjah Mada University, Indonesia)	
<b>1570853516</b>	<b>Security Analysis and Improvement for Satellite and Mobile Network Integration</b>	<b>469</b>
	Meiling Chen (CMRI, China)	
<b>1570843844</b>	<b>Quality Control Through Game Theory of a Cascading Multi-robot Machine Vision System</b>	<b>475</b>
	Samuele Benfatti, Ivano Donadi and Elvina Gindullina (University of Padova, Italy); Leonardo Badia (Università degli Studi di Padova, Italy)	

## COMMITTEES

### Advisory Board:

Dr-Ing Wahyudi Hasbi, M.Kom  
Prof. Dr. Ir. Gamantyo Hendrantoro, Ph.D.  
Dr. Ign. Wiseto P. Agung  
Dr. Arifin Nugroho  
Dr. Muhammad Ary Murti, M.T  
Arief Hamdani Gunawan, SMIEEE  
Dr. Bambang Setia Nugraha

### General Chair :

Dr. Arfianto Fahmi, M.T

### General Co-chair:

Dr. Anggun Fitriani Isnawati, M.Eng

### Technical Program Committee (TPC)

#### Chair:

Dr. Wahyu Pamungkas, M. T

#### Co-Chair:

Dr. Tenia Wahyuningrum, M.T  
Eko Fajar Cahyadi, S.T., M.T., Ph.D.

### Technical Program Committee (TPC) Member:

Prof. Abdallah Makhoul (University of Franche-Comté, France)  
Prof. Abdelmadjid Bouabdallah (Universite de Technologie – Compiègne, France)  
Prof. Adão Silva (Instituto de Telecomunicações (IT)/University of Aveiro, Portugal)  
Prof. Ahmed Mehaoua (University of Paris Descartes, France)  
Prof. Alvaro Suárez-Sarmiento (University of Las Palmas de Gran Canaria, Spain)  
Prof. António Rodrigues (IT / Instituto Superior Técnico, Portugal)  
Prof. Arnaldo Oliveira (Universidade de Aveiro – DETI / Instituto de Telecomunicações – Aveiro, Portugal)  
Prof. Aws Yonis (Ninevah University, Iraq)  
Prof. Bang Chul Jung (Chungnam National University, Korea (South))  
Prof. Bernd Wolfinger (University of Hamburg, Germany)

Prof. Bong Jun Choi (Soongsil University, Korea (South))  
Prof. Carl Debono (University of Malta, Malta)  
Prof. Carla Raffaelli (University of Bologna, Italy)  
Prof. Carlos Becker Westphall (Federal University of Santa Catarina, Brazil)  
Prof. Chao Fang (Beijing University of Technology, China)  
Prof. Chao Shen (Xi'an Jiaotong University, China)  
Prof. Chao-Tsun Chang (Hsiuping University of Science & Technology, Taiwan)  
Prof. Chia-Ho Ou (National Pingtung University, Taiwan)  
Prof. Demosthenes Vouyioukas (University of the Aegean, Greece)  
Prof. Dennis Pfisterer (University of Luebeck, Germany)  
Prof. Ding Wang (Nankai University, China)  
Prof. Domenico Ciuonzo (University of Naples Federico II, IT, Italy)  
Prof. Dushantha Nalin K. Jayakody (Tomsk Polytechnic University, Russia)  
Prof. Eduard Babulak (Liberty University, USA)

**Abstract**—One of the components that support the smart city program is the existence of a smart environment. A smart environment is a form of environmental management by paying attention to the environment in future city development. The current problem is that smart cities in Indonesia are not optimal, especially regarding flood mitigation handling sources from rivers and river water quality. Floods in urban areas often cause material losses and cause fatalities, especially with the increasing significance of the impact of climate change, which is difficult to predict. Thus, there is a need for sustainable Internet of Things (IoT)-based river monitoring to monitor river water levels and quality. This research aims to apply the Internet of Things for flood mitigation and environmental sustainability. The architecture used is using Antares as a cloud media. The results obtained by monitoring the river showed that the influence of the provider in sending sensor data is influenced by the availability of network service facilities in locations. In addition, the fastest data transmission lasts five seconds. At the same time, the suitability of data transmission occurs in under two minutes.

**Keywords**—Antares, Big Data, Flood, Internet of Things, Mitigation

## I. INTRODUCTION

The city of the future is a livable city that can anticipate various conditions. In an effort toward a future city, the smart city is an alternative to create a city ecosystem and sustainably improve the quality of human life. In 2035, it is estimated that 66.6% of Indonesia's population will live in cities [1]. In addition, in 2020, as many as 56.7% of Indonesia's population will already live in urban areas [1]. A strategic step in utilizing urbanization effectively, Indonesia's future city requires smart city governance towards a sustainable city by creating a smart environment, namely Technology-based environmental management, especially flood mitigation from rivers and river water quality.

In the future city, rivers play an essential role in supporting the balance of nature and human life. The current challenge is that river flow is very dynamic due to climate change which causes the distribution of rain and rainfall in each region to vary. One of the impacts of climate change is flooding. In recent months, floods often occurred in big cities caused by overflowing rivers due to high rainfall, such as Kuala Lumpur, Malaysia, Jakarta, Indonesia, and Bahia, Brazil. In addition,

the impact of flooding that is very undesirable is the loss of life. As anticipation, monitoring is needed for mitigation in order to reduce casualties. Currently, monitoring is generally still manual, using river guards at the river water control post to find out the river's water level monitored by officers. This mitigation is ineffective because officers still have to inform officers and the community from upstream to downstream when the river's height can potentially flood. Therefore, the solution offered is flood mitigation based on IoT (Internet of Things) technology for monitoring river water levels and quality to anticipate river pollution.

In previous studies, river mitigation based on the Internet of Things was used for monitoring water level detection using a wireless sensor network in Samarinda, Indonesia [2]. In addition, IoT-based flood monitoring design [3], [4]; IoT-based monitoring of water quality in Citarum River in Indonesia using pH, TDS, and Turbidity sensors [5]; IoT-based polluted river monitoring [6], [7]; and monitoring of domestic wastewater pollution in residential areas using IoT: a case study in Bandung Indonesia [8]; IoT Application with Visual Analytics for Water Consumption Monitoring [9]. However, from research that has been done, the Internet of Things has not implemented mitigation by combining monitoring for flood mitigation and environmental sustainability. In addition, previous research has not discussed the timing performance in the notification of sensor data sending.

Therefore, this research aims to apply the Internet of Things to flood mitigation and river environmental sustainability. In addition, this study compares the performance of the Antares architecture in sending sensor data with different network service providers. Sensors used are Ultrasonic sensors to determine the river water level, pH and Turbidity sensors for river water quality, and Raindrops sensors to determine rain conditions.

## II. MATERIAL AND METHOD

### A. Study Area

This research was conducted in Banyumas, Indonesia, precisely in Karanggintang Village. The research location is in the city center with densely populated conditions (Lat: 109.24; Long: -7.36). Karanggintang is traversed by the Pelus

Fig. 1. Research location (Lat: 109.24; Long: -7.36)

river. The Pelus River flows through the city with a steady flow of water and tends to be swift. The Pelus River is representative of urban areas. This condition is a consideration for researchers to choose research locations for the Internet of Things application as mitigation and environmental sustainability in urban areas. The research location can be seen in Fig 1.

**B. Antares Platform**

In storing and managing data traffic, implementing the Internet of Things (IoT) requires a virtual platform or place that can manage and create applications with various kinds of connectivity. One of the services that can be used for this arrangement is Antares. The Antares is a service provided by local producers from PT Telkom Indonesia. Antares prioritizes zero infrastructure management so that users do not need to provide server infrastructure because all data has been stored in the cloud. The data consumption is obtained through the API. This platform can communicate via standard protocols like MQTT, HTTP, and CoAP. Antares architecture makes connecting easier for users as needed; architectural details can be seen in Fig 2. In addition, to simplify configuration Antares also provides libraries for Android and Arduino-based microcontrollers [10].

**C. Methodology**

The Internet of Things technology system was built through several stages in this research. Researchers determine several sensors as input data according to the needs of river conditions. The sensors used are Ultrasonic, Turbidity, pH,

Fig. 2. Antares data model architecture [11]

and raindrops sensors. The next step is to determine the control system using ESP32 Wi-Fi and Arduino IDE.

In the Internet of Things technology built, researchers also use solar panels as a power supply to ensure the power supply needed by sensors and controls. In addition, Antares IoT platform as a data storage and distribution controller and 4G Wi-Fi as a gateway for sending sensor data. Details of the design of the Internet of Things application system can be seen in Fig 3. Meanwhile, based on Fig. 3, the explanation of components and data transmission is as follows:

- **Component System**

The components used in this research focus on river mitigation and environmental sustainability. So that the selected components are adjusted to the needs for mitigation and monitoring of river sustainability, details of the components used can be seen in Table I.

TABLE I. COMPONENTS OF THE IMPLEMENTATION OF INTERNET OF THINGS

Image	Components
	Ultrasonic HC-SR04 Sensor; As an indicator of the water discharge height in the river.
	Rain Sensor; As an indicator to determine the rain condition at the river's location.
	pH Sensor Kit PH-4502C Electrode Probe; As an indicator to determine the pH of river water.
	Turbidity Sensor; As an indicator to determine water quality by detecting the level of turbidity in river water.
	ESP32 WiFi; As control and transfer sensor data to the cloud or Antares.
	Antares; As a data storage platform for sensor data settings received from ESP32.

Fig. 3. Overall system design

- Data Transmission

This study uses a WiFi media gateway to transmit data between ESP32 or control. Then internet connection at the gateway using available cellular providers such as Telkomsel and Smartfren. In addition, the cloud used is the Antares platform. The Antares platform provides the Antares ESP32 Library to define the system as a configuration with a device. Furthermore, between ESP32 and Antares database using HTTP. The HTTP library installation is done through the Library Manager on the Arduino IDE. Several uses of Antares in IoT applications have been carried out: for Low-cost wireless sensor networks using Antares platform for gas measurement [12]; Automatic controlling system and IoT-based monitoring for pH rate in aquaponics [13]; System of Measuring PH, Humidity, and Temperature Based on Internet of Things (IoT) in plants [14].

- Prototype Design

This study's prototype design was based on adjustments to existing conditions in the river. The prototype design is equipped with part equipment, such as solar panels, as a power supply to charge the battery continuously. In addition, the prototype design is also equipped with a panel box to protect components from rainwater.

An equally important part is the position of the sensor: The raindrop sensor is located above the panel box along with the solar panel; the Ultrasonic sensor is under the panel box; and the Turbidity Sensor and pH below touch the water. Details of the prototype design in the design of Internet of Things technology can be seen in Fig 4.

### III. RESULT AND DISCUSSIONS

The system of the Internet of Things as mitigation in this study was carried out through several tests. The tests carried out are sensor testing and data transmission testing. Based on several test scenarios, the test results are as follows.

#### A. Sensor Measurement

Sensor testing is done to determine the performance of the sensor. Each sensor has a different treatment. The ultrasonic sensor is compared between the actual object and the distance measurement results on the sensor, as shown in Table II. Then an error calculation is carried out to determine the difference between the two results with Formula 1.

$$Error = |(Y - Y_i) / Y * 100\%| \quad (1)$$

$Y$  is the reference (Object distance), and  $Y_i$  is the actual data (Distance sensor output).

The calculation results show that the average error is below 3% from ten measurements. So, this threshold proves that the relative performance of the sensor works well.

Fig. 4. Internet of Things technology prototype design for flood mitigation

TABLE II. ROXIMITY SENSOR MEASUREMENT

No	Ultrasonic Sensor Measurement		
	Object distance (cm)	Distance sensor output (cm)	Error (%)
1	5	5	0
2	10	10	0
3	15	15.2	1

No	Ultrasonic Sensor Measurement		
	Object distance (cm)	Distance sensor output (cm)	Error (%)
4	20	20.4	2
5	25	25.5	2
6	30	30.5	2
7	35	35.4	1
8	40	40.5	1
9	45	45.6	1
10	50	51	2

The next sensor is a water turbidity sensor to determine water quality. In testing this sensor, the researchers divided it into three scenarios, namely (1) clear water, (2) cloudy water, and (3) river water, which can be seen in Table III. Based on the measurement results, the average clear water value is 12.56. While river water is 39.93 and cloudy water is 265.91. This result shows that the cloudier the measured water, the higher the value obtained by the sensor.

TABLE III. TURBIDITY SENSOR MEASUREMENT

No	Water Quality Measurement (mg/L)		
	Clear Water	Cloudy Water	River Water
1	12.89	266.41	41.58
2	12.52	265.62	40.87
3	12.6	265.72	38.01
4	12.52	265.38	36.33
5	12.57	265.97	36.21
6	12.62	266.06	40.31
7	12.77	266.04	44.41
8	12.94	265.87	42.41
9	12.18	266.33	37.52
10	12.01	265.77	41.67

In measuring the pH sensor, the researchers divided it into several scenarios. Scenarios (1) Buffer 4.1 (Table IV); (2) Buffers 7.1 (Table V); and (3) Buffers 9.1 (Table VI). From the three measurements, the average error measurement (Formula 1) sequentially from the lowest to the highest buffer was 1.58%, 0.53%, and 2.22%. Based on the three scenarios, Buffer 7.1 is relatively stable and has a small error value. Therefore, the researchers made Buffer 7.1 with an average error of 0.53% as a reference for using the pH sensor.

TABLE IV. ACIDITY SENSOR MEASUREMENT (BUFFER 4.1)

No	pH Sensor with Buffer 4.1		
	Actual pH	pH Measurement	Error (%)
1	4.1	4.07	0.732
2	4.1	4.02	1.951
3	4.1	4.05	1.220
4	4.1	4.18	1.951
5	4.1	4.1	0.000
6	4.1	4.09	0.244
7	4.1	3.9	4.878
8	4.1	4.01	2.195
9	4.1	4	2.439
10	4.1	4.09	0.244

TABLE V. ACIDITY SENSOR MEASUREMENT (BUFFER 7.1)

No	pH Sensor with Buffer 7.1		
	Actual pH	pH Measurement	Error (%)
1	7.1	7.08	0.282
2	7.1	7.08	0.282
3	7.1	7.23	1.831
4	7.1	7.14	0.563

No	pH Sensor with Buffer 7.1		
	Actual pH	pH Measurement	Error (%)
5	7.1	7.06	0.563
6	7.1	7.07	0.423
7	7.1	7.07	0.423
8	7.1	7.09	0.141
9	7.1	7.15	0.704
10	7.1	7.09	0.141

TABLE VI. ACIDITY SENSOR MEASUREMENT (BUFFER 9.1)

No	pH Sensor with Buffer 9.1		
	Actual pH	pH Measurement	Error (%)
1	9.4	9.28	1.277
2	9.4	9.24	1.702
3	9.4	9.33	0.745
4	9.4	9.28	1.277
5	9.4	9.68	2.979
6	9.4	9.55	1.596
7	9.4	9.61	2.234
8	9.4	9.6	2.128
9	9.4	9.74	3.617
10	9.4	9.84	4.681

The last sensor measurement is the raindrops sensor (Table VI). This sensor works with an output of "0" indicating no rain. At the same time, "1" is raining. In measuring the output produced when the sensor is exposed to water, the sensor sends data "1" or rain

### B. Data Delivery Test

Sending sensor data in the Internet of Things technology is very important. Generally, sending sensor data requires a tiered path. This technology can be an obstacle when monitoring in real-time. Sending data in real-time is very necessary, especially for flood mitigation related to human safety.

This study transmits data from the control sensor to the cloud (Antares platform). The data transmission test was tested with several providers to find out how fast and accurate the data sent from the sensor was until the user reads it. In addition to testing, it aims to determine the availability of the network at the service provider. Because one of the factors constraining data transmission in real-time is the availability of services, this test is needed to ensure speed and accuracy in sending sensor data to the user. Here is the flow to send data via HTTP on the Antares database with ESP32.

```
#include <AntaresESP32HTTP.h>
#define ACCESSKEY "your-access-key"
#define WIFISSID "your-wifi-ssid"
#define PASSWORD "your-wifi-password"
#define applicationName "your-application-name"
#define deviceName "your-device-name"

AntaresESP32HTTP antares(ACCESSKEY);
void setup() {
  Serial.begin();
  antares.setDebug();
  antares.wifiConnection(WIFISSID,PASSWORD);
}
void loop() {
  // Fill variables with random values, with different data types
  int temp = random();
  float rainlv = float();
  // Inserting variable values into temporary data storage
  antares.add("temperature", temp);
  antares.add("rain_level", rainlv);
  // Send from data repository to Antares
  antares.send(applicationName, deviceName);
  delay();
}
```

TABLE VII. TESTING SPEED AND SUITABILITY OF DATA TRANSMISSION BASED ON SEVERAL PROVIDERS

Provider	Start Time	Receive Time	Sensor			
			Raindrops	Turbidity	pH	Ultrasonic
Smartfren (A)	09:00:00	09:01:35	No rain	41.58	7.14	60.3
		09:03:42	No rain	40.31	7.06	60.5
		09:04:21	No rain	44.41	7.07	60.7
		09:05:52	No rain	42.41	7.14	60.3
		09:06:11	No rain	42.41	7.06	60.5
		09:07:32	Rain	265.77	7.23	40.6
		09:08:54	Rain	265.77	7.23	40.7
Telkomsel (B)	09:00:00	09:00:05	No rain	44.41	7.21	60.4
		09:00:10	No rain	42.41	7.14	60.3
		09:00:15	No rain	42.41	7.06	60.5
		09:00:20	No rain	41.58	7.07	60.5
		09:00:26	No rain	40.31	7.07	60.2
		09:00:31	No rain	44.41	7.09	60.7
		09:00:36	No rain	42.41	7.23	60.4
		09:00:41	No rain	43.41	7.14	60.5
		09:00:46	No rain	41.58	7.07	60.5
		09:00:51	No rain	40.31	7.09	60.6
		09:00:56	No rain	44.41	7.23	60.3
		09:01:01	No rain	42.41	7.07	60.4
		09:01:06	No rain	41.41	7.09	60.3
		09:01:11	No rain	41.58	7.14	60.2
		09:01:16	No rain	40.31	7.06	60.2
		09:01:21	No rain	41.58	7.07	60.3
		09:01:26	No rain	40.31	7.14	60.4
		09:01:30	No rain	44.41	7.06	60.4
		09:01:35	Rain	265.72	7.23	40.5
		09:01:40	Rain	265.38	7.23	40.2

Time (WIB)	Resource Index (ri)	Data
2022-08-18 13:11:00	/antares-cse/cin-f1hHT9CJRRe9b_2Q	{ "Turbidity": 25.6286, "Power_of_Hydrogen": 21.29028, "Distance": 32.368, "weather": "HUJAN" }

Fig.5. Web-based Internet of Things monitoring interface

Table VII the tests were carried out at river locations with the same treatment. Each sensor is treated the same. The raindrops sensor was given a water splash stimulus, and the Turbidity Sensor and the pH were given a cloudy water

stimulus. Then the ultrasonic sensor is given a stimulus object closer than before.

Based on the tests in Table VII. The two providers have significant differences. For provider A to transmit data continuously, the average delivery speed is above one minute for one data transmission. Then for the accuracy of data transmission, there is a delay of seven minutes from the initial stimulus on the sensor, namely 09:00 to 09:07. While in provider B, the speed for sending data is continuous. The average speed reaches five seconds for one data transmission. In addition, the accuracy for data transmission is under two minutes from the initial stimulus on the sensor, which is 09:00 to 09:01:40.

The test results from the two providers follow Table VII; not all of these tests can be equated at every location. These results can also be influenced by the provider's availability of service networks in each region. However, it is necessary to pay attention to the implementation of the Internet of Things, which requires real-time data or human safety. Consideration of service providers becomes crucial in sending data.

Furthermore, based on Fig 5. The river monitoring interface is built on top of the Antares platform features. Data from sensors sent, data recorded in a cloud-based database provided by Antares. The interface is built web-based. Visualization of data transmission is done in real-time.

#### IV. CONCLUSION

The application of the Internet of Things for flood mitigation and environmental sustainability is functioning well. IoT mitigation technology with Antares platform architecture is relatively easy with various features that can be integrated. In addition, in the application of IoT, the availability of network services in sending sensor data is essential, especially for real-time data transmission related to human safety. This is evidenced by the difference in speed and accuracy in data transmission. Provider A, the speed of sending data is under 1 minute, and the accuracy of sending data is 7 minutes. While in provider B, the speed of sending data is under 5 seconds, and the suitability of sending data is under 2 minutes.

Suggestions for future work, monitoring can be done to find out the power used in Internet of Things devices. In addition, visualization also uses the location coordinates of each river flow.

#### ACKNOWLEDGMENT

We would like to thank to DPRTEM (Direktorat Riset, Teknologi dan Pengabdian Masyarakat) Direktorat Jenderal Pendidikan Tinggi, Riset dan Teknologi Republik Indonesia for supporting this research financially.
